

**2007 DRAFT OPERATING BUDGET – DETAILS SUPPORTING
ADDITIONAL RESOURCE REQUESTS**

Recommendation

The Commissioner of Finance & Corporate Services and the Acting Director of Budgeting & Financial Planning recommends:

That the following report be received for information purposes and the additional requests be approved.

Purpose

To provide the schedules supporting the additional resource request summary submitted to the Budget Committee on the February 6th, as part of the Draft 2007 Operating Budget, for Budget Committee consideration and base budget inclusion.

Background

At the February 6, 2007 Budget Committee meeting, staff provided a summary of Senior Management's recommended Additional Resource Requests. As previously illustrated in the February 6th report, the operating budget guidelines were complimented by a process that allowed departments to formally submit requests for essential resources not permitted by the established operating budget guidelines for Senior Management and/or Council further consideration. Council approval is specifically required when, new staff resources are requested, there is a change in service levels or new initiatives are brought forward. These requests are not included in the Draft 2007 Base Operating Budget.

The additional resource request submissions were grouped into the following categories;

- o Maintaining Service Levels
- o Regulatory Requirements
- o New Initiatives/Enhanced Services

In addition to the summary information previously provided, all additional resource request submissions and supporting information (e.g. forms, business cases, justification memos, etc) are provided as Attachment 1. For the Budget Committee's convenience the additional resource request summary reflects each requests added value and link to Vaughan Vision objectives.

Relationship to Vaughan Vision 2007

The Operating Budget process is consistent with the priorities set by Council in Vaughan Vision 2007.

Conclusion

The purpose of this report is to provide the schedules and detail supporting the additional resource request summary submitted to the Budget Committee on the February 6th, as part of the Draft 2007 Operating Budget, for budget committee consideration and base budget inclusion. Not all requests submitted have been brought forward.

COMMISSIONER APPROVAL: *JANIS PETERSON*

The City Above Toronto

The City of Vaughan
2141 Major Mackenzie Drive
Vaughan, Ontario
Canada L6A 1T1
Tel (905) 832-2281

Date: February 1, 2007

To: Janice Atwood-Petkovski,
Commissioner of Legal and Administrative Services

From: Sybil Fernandes
Manager – Administrative Services/Deputy City Clerk

RE: NEW COMPLEMENT POSITION REQUEST
ADMINISTRATIVE ASSISTANT (MAYOR'S OFFICE)

The Mayor's office has requested the above new complement position to replace the former part-time assistance that was utilized in this area. The 2006 part-time salary incurred for this assistance was \$37,028.89.

Further, it is intended that the former position entitled "Secretary to Mayor and Members of Council" be downgraded from Grade 2 to Grade 1 and that the job functions and title of this position be revised. The difference between Grade 2 and Grade 1/Step 1 is (41,725. -- 37,931.) \$3,794.

Funding required for this position is:

Salary	\$50 489
Benefits	<u>12 875</u>
	\$63 364

Less:	
P.T. monies already budgeted	<u>37 028</u>
	\$26 336

Less:	
Savings achieved due to revised position in the area	<u>3,794</u>
	<u>\$22 542</u>

A job description for a similar position in this area is attached. It should be noted that although the functions for both Administrative Assistant positions in this area are somewhat similar, the functions for both positions are currently under review.

Sybil Fernandes

Sybil Fernandes
Manager – Administrative Services/Deputy City Clerk

INCREASE OFFSITE RECORDS STORAGE

The City Above Toronto

Appendix VII - Schedule U

Request for Increases in Expenses Other Than Allowable Increases

1) Description of the Increase

- Additional funds are required to pay for off-site records storage.
- The Records Centre is full.
- See attached memo - Rationale for this Request.

2) Link to Vaughan Vision Objectives

- This initiative is undertaken as a cost effectiveness measure as defined by D-1 of the 2007 Vaughan Vision.
- See attached memo - Vaughan Vision Objectives.

3) Financial Impact

Detail the 2007 initial increase, full year impact, etc.

- The Records Management Division requires that an additional \$20,530.00 be allocated to the Records Management Supplies Account in 2007.
- See attached memo - Economic Impact - Cost Benefit Analysis.

BUSINESS UNIT NUMBER: 060050

BUSINESS UNIT NAME: RECORDS MANAGEMENT

The City Above Toronto

Appendix VII - Schedule U

Request for Increases in Expenses Other Than Allowable Increases

a) Associated Benefits

E.g. service levels maintained, long-term cost savings, improved productivity, etc.

- This would allow the Records Management Division to maintain our existing service level.
- See attached memo - Other relevant considerations - Future Cost Considerations.

b) Implications of Not Receiving the Requested Amount

- The City of Vaughan's Records Centre will not be able to store additional records from City departments if this funding request is denied.
- Records would not be kept in a secure accessible manner as required by the Ontario Financial Act.
- Storage of the records storage boxes in the office area may raise health and safety concerns.
- See attached memo - Implications of not receiving additional resources.

BUSINESS UNIT NUMBER: 060050 BUSINESS UNIT NAME: RECORDS MANAGEMENT

2007 OPERATING BUDGET - SCHEDULE "U"REQUEST FOR INCREASES IN EXPENSES OTHER THAN ALLOWABLE INCREASESRECORDS MANAGEMENT SUPPLIES ACCOUNT – 060050.7202Background- Rational for this Request

In 1991, the Records Management Division managed 4,272 records storage boxes. In 2005, the Records Management Division managed about 20,910 records storage boxes. The volume of records storage boxes being managed has increased by about 400 percent since 1991. A Regional Municipality of York study determined that paper records are increasing at a rate of about 22 percent per year. From 1991 to 2005, the volume of hardcopy records being created by the City of Vaughan has increased at an annual rate of about 26 percent.

There are 14,000 records storage boxes stored on-site at the Joint Operations Centre. The Records Centre at the Joint Operations Centre is full. Vital records and records with high reference rates are stored on-site at the Joint Operations Centre. Records with a low reference rate are stored at Iron Mountain, the City of Vaughan's off-site records service provider. By December 31, 2006, the City of Vaughan will have about 8,000 records storage boxes stored off-site at Iron Mountain.

Annually, approximately 1,500 new records storage boxes are created. The City of Vaughan destroys about 500 records storage boxes per year. The Records Management Division has a net gain of approximately 1,000 records storage boxes on an annual basis that must be transferred off-site for storage and managed according to accepted records management practices.

Vaughan Vision Objectives

It would be very expensive to set up and operate an additional Records Centre to store the City of Vaughan's inactive business records that cannot be accommodated in the current Records Centre. It is more cost effective for the City of Vaughan to outsource the storage of these inactive business records. This requires no additional staff and equipment resources. This initiative is undertaken as a cost effectiveness measure as defined by D-1 of the 2007 Vaughan Vision.

Economic Impact – Cost Benefit Analysis

The budget allocation for the Records Management supplies account is \$43,170.00. The Records Management supplies account is used to purchase records storage boxes, to pay for off-site records storage and destruction as well as to retrieve records from Iron Mountain. In 2007, an additional \$21,830.00 is requested for this account as an uncontrollable expense. These costs cannot be absorbed within the Records Management Division's budget. Additional costs will be incurred to transfer, store and access these records while they are stored at Iron Mountain.

Cont'd....2

-2-

The Records Management Division has a net gain of about 1,000 records storage boxes per year that will need to be transferred off-site to Iron Mountain for storage as shown below:

<u>Year</u>	<u>Records Transferred Off-site</u>	<u>Volume at Iron Mountain</u>
2005**	1500	7,000
2006*	1000	8,000
2007*	1000	9,000
2008*	1000	10,000
2009*	1000	11,000

* projected volume of records to be transferred to Iron Mountain in future years

** Includes Powerstream records

NOTE: As of April 1, 2006, Powerstream records are no longer under the City of Vaughan's custody and control. Powerstream has established their own Records Management Program.

Implications of not Receiving Additional Resources

The Ontario Municipal Act requires that the City of Vaughan store their records in a secure environment in an accessible manner. The Records Centre would not be able to store additional records from the Civic Centre and other City facilities if this funding request is denied. City Departments would be required to keep records on-site in any available space such as hallways, in basements, etc. The storage of boxes in hallways would raise health and safety concerns. Records stored in hallways and in basement areas would not be accessible or be stored in a secure environment. Staff may not be able to find information in a timely manner in order to make an informed decision.

Other Relevant Considerations – Future Cost Considerations

The City of Vaughan's need to store records at Iron Mountain will be reduced when the new civic centre is built. The Records Management Division and City Archives are scheduled to acquire about 5,000 square feet of space for records storage in the new civic center. Records from the Building Standards Department file room will be stored in the new civic centre records centre.

The storage of these business records on-site could result in significant cost savings. It is expected that the funds required in the Records Management supplies account will be reduced when the new civic centre is built. The need to order the inactive business records from Iron Mountain, wait for their next day delivery and then take the records to the requester will be reduced. Our level of customer service will improve as City departments and the public will have access to inactive business records in a timely manner in order to make an informed business decision. All of the City's archival records and permanently valuable records will be stored in one location. These records will be subject to proper temperature and humidity controls as part of the City of Vaughan's Vital Records Protection Program.

The City Above Toronto

PARKING LICENSING SYSTEM

Appendix VII- Schedule U

Request for Increases in Expenses Other Than Allowable Increases

1) Description of the Increase

Annual Service contract with Groupe Techna expires in December 2006.

Groupe Techna has indicated an increase to the next contract will be in approximately \$5000.

2) Link to Vaughan Vision Objectives

A1 – Pursue excellence in the delivery of core services

D1 – Enhance productivity and Cost Effectiveness

D3 – Enhance Technology and Pursue Innovation

3) Financial Impact

Detail the 2007 initial increase, full year impact, etc.

\$5000 increase is the full year impact

A handwritten signature in black ink, appearing to be "JAP".

The City Above Toronto

BUSINESS UNIT NUMBER: _____ BUSINESS UNIT NAME: _____

Appendix VII - Schedule U

Request for Increases in Expenses Other Than Allowable Increases

4) Associated Benefits

E.g. service levels maintained, long-term cost savings, improved productivity, etc.

The increase in the amount for the service contract will result in improved productivity and revenue to the City.

Implications of Not Receiving the Requested Amount

The service contract is required to operate our parking system. Without the agreement in place, tickets would have to be written and entered into a database manually, both of which is highly inefficient.

BUSINESS UNIT NUMBER: 080142 BUSINESS UNIT NAME: ENFORCEMENT

Appendix VII - Schedule U

The City Above Toronto

Request for Increases in Expenses Other Than Allowable Increases

6) Justification Measures

Provide statistical analysis, performance measures & comparisons which demonstrate the need for the request.

The contract covers parking ticket machines, the associated licensing costs, and repairs. The machines currently in use are many years old and have been long discontinued by the manufacturer. This makes repairs and parts very costly.

The new new service contract will address the aging machines through replacements of irreparable machines, no increase in licensing fees, repairs and parts, and supply tickets which is currently not included in the agreement.

The improved machines will provide an increase in revenue potential as the tickets will contain supporting information of the offence (photographs), that will result in less tickets being withdrawn. With newer machines, the staff will be more productive as the machines will process violations faster.

7) Other Relevant Comments

BUSINESS UNIT NUMBER: 080142

BUSINESS UNIT NAME: ENFORCEMENT

Appendix VII- Schedule U

**Request for Increases in Expenses
Other Than Allowable Increases**

1) Description of the Increase

Increase the professional fees budget by \$25,000.00.

The 2006 budget was \$156,610. We propose to increase this amount for 2007 by \$25,000 given that the City will be negotiating four (4) collective agreements during 2007. Further, we anticipate that at least ten (10) grievances have been forwarded or will be forwarded to arbitration requiring costs for external legal counsel as well as arbitrator costs.

2) Link to Vaughan Vision Objectives

- B - Manage our resources
- B-1 - Ensure Short-Term & Long Term Financial Stability
- C-2 - Attract, Retain and Promote Skilled Staff

3) Financial Impact

\$25,000.00

BUSINESS UNIT NUMBER: _____ BUSINESS UNIT NAME : _____

Appendix VII- Schedule U

Request for Increases in Expenses Other Than Allowable Increases

4) Associated Benefits

Professional fees (legal fees) associated with consultations, attending meetings, representation at arbitration hearings, including interest arbitration, etc.

5) Implications of Not Receiving the Requested Amount

The negotiation of our collective agreements has been dealt effectively over the past few years with the assistance of appropriate legal advice. Also we have been able to resolve grievances and reach mediated solutions that benefit both the employees and the organization.

We have accomplished this by seeking appropriate professional counsel when required.

BUSINESS UNIT NUMBER: _____ BUSINESS UNIT NAME : _____

Appendix VII- Schedule U

**Request for Increases in Expenses
Other Than Allowable Increases****6) Justification Measures**

In 2006 our professional fees budget was utilized almost in full.

In 2007 four (4) collective agreements will be in collective bargaining.

We have more than ten (10) grievances that we anticipate will reach arbitration in 2007.

RATIONALE TO HIRE A PERMANENT PART TIME CLERK

September 8, 2006

Objective

To hire a Permanent Part Time Clerk 24 hours per week.

Impact

The 2005 Budget allotment for Temp expense was \$9,900.00 but records show that we spent a total of \$20,000.00. Again in 2006 the budget allotment was \$9,900.00 and year to date June 2006, we spent a total of \$8,000.00.

Background

Based on the above salaries for a Temporary Part Time Clerk that only gave us coverage for approximately 8 months, it will be more cost effective to hire a Permanent Part Time Clerk that would give coverage for a full year.

This clerk will be starting at \$16.75 per hour for a total of \$20,904.00/year plus 13.2% for benefits \$2,759.33 for a total cost of \$23,663.33.

Due to the increase in the fleet size, the workload in fleet services has increased proportionately and fleet has progressively taken on more responsibilities;

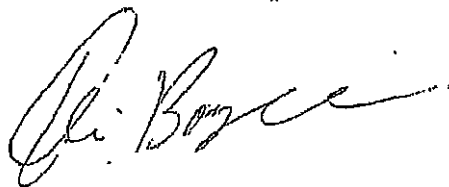

- driver's abstracts
- licencing City vehicles
- setting up and monitoring accident and related files
- increase in invoice payments
- Ministry of Transportation audits
- driver files and training information
- proper record keeping to prevent fines by MTO

The Permanent Part Time Clerk will perform the following duties:

- maintaing filing system for vehicles, administration and drivers files
- assisting staff with emergency requests such as keys, forms and giving information
- assisting in opening and closing work orders
- answering emergency and daily telephone calls
- and perform daily office related duties

Because of this increase, the fleet supervisor recommends that a Permanent Part Time Clerk be hired.

DEPARTMENT: DRAFTING (Planning) BUSINESS UNIT NUMBER 180442

COMMISSIONER APPROVAL: 

DATE: August 31, 2006
TO: John Zipay, Commissioner of Planning
RE: Request for Staff Complement Increase – GIS Technician
2007 Draft Operating Budget – Development Planning Dept.

As part of the Development Planning Department's Operating Budget for 2007, a request is being made for an additional "GIS Technician" complement.

It is important to note that the City has experienced high growth rates in recent years, and it is anticipated that growth rates will continue to be high in the coming years. The number of GIS staff has remained fairly consistent over the past years in comparison to the substantial growth in population, businesses and industries that require the technical services of GIS staff for mapping information, street numbering, and municipal address changes. There is also increased requests by other City Departments for digital mapping information to complete their work, including to achieve corporate initiatives, which are often complex and involve a significant amount of staff time and resources to complete, and which often compete with initiatives to be completed for the Development Planning Department. For the first half of 2006 the total amount of time spent by the GIS Section involved in projects for other City Departments amounted to approximately 250 FTE hours between the 3 staff. This additional workload is impacting the ability of staff to complete the Department projects on time. It should also be noted that all services are converting from a paper format to a digital format, which requires significant time to input and maintain spatial databases for official plan, zoning by-law and parcel fabric, including keeping the Department's Development Tracking Application (DTA) system both efficient and up-to-date.

The volume of development applications processed by the Development Planning Department requires digitally formatted and information enhanced attachments for application circulations, staff reports, official plan and zoning by-law amendments, site plan and condominium agreements, and presentation materials for meetings and OMB Hearings, which are required to be completed within short and often competing time lines. The work performed by GIS staff also includes projects for the Policy Planning Department for their planning studies and block plans, which involve significant mapping and often requiring a substantial amount of time to generate and complete.

memorandum

GIS Staff in the Planning Department:

<i>Municipality</i>	<i>Population</i>	<i>No. of GISStaff</i>
<i>Mississauga</i>	685,000	15
<i>Markham</i>	273,000	5
<i>Vaughan</i>	244,000	3
<i>Brampton</i>	435,000	4

The new complement of "GIS Technician" will ensure that the Department continues to provide quality customer service to our clients. The additional staff complement will allow the workload to be more evenly distributed amongst GIS staff, thereby ensuring a higher quality of work, less overtime and lieu time claims to complete time sensitive projects and to address an increasing demand on GIS services, and to ensure that work is processed within acceptable time lines.

If you have any questions, please call me.

Respectfully,

MARCO RAMUNNO

DEPARTMENT: DEVELOPMENT BUSINESS UNIT NUMBER 18044D

COMMISSIONER APPROVAL:

DATE: September 1, 2006
TO: John Zipay, Commissioner of Planning
RE: Request for Staff Complement Increase – Urban Designer
2007 Draft Operating Budget – Development Planning Dept.

As part of the Development Planning Department's Operating Budget for 2007, a request is being made for an additional "Urban Designer" complement.

It is important to note that the City has experienced high growth rates in recent years, and it is anticipated that growth rates will continue to be high in the coming years. It has become increasingly evident that the public and marketplace has come to demand and expect high quality communities. One factor that contributes to the livability of a community is the quality of the urban design and built form. Urban design and architecture constitute a critical element in the process of community building. Treatments that emphasize attractive streetscapes and a high quality pedestrian environment are now reflected in the marketplace.

The volume and complexity of development applications and associated processing work related to meetings, site visits, design guidance and policy implementation has impacted upon staff time to deliver urban design and landscape architecture services in a timely manner. The work performed by the Urban Design section also include projects for the Policy Planning Department for their planning studies, block plans and official plan amendments which involve significant professional urban design and landscape architecture analysis and input, and often requires significant time to complete.

memorandum

Total Number of Applications per Urban Designer for 2004 and 2005:

<i>Municipality</i>	<i>Population</i>	<i>No. of Urban Design Staff</i>	<i>No. of Files(2004) (Site Plans and Subdivisions)</i>	<i>In 2004 (Files per Urban Designer)</i>	<i>No. of Files(2005) (Site Plans and Subdivisions)</i>	<i>In 2005 (Files per Urban Designer)</i>
<i>Mississauga</i>	695,000	10	468	47	407	41
<i>Markham</i>	273,000	9	171	19	146	16
<i>Vaughan</i>	244,000	4	208	52	190	48
<i>Burlington</i>	151,000	5	139	27	106	21

The chart shows municipalities of comparable size with similar development activity. The chart identifies that other municipalities have more Urban Designers and are responsible for less applications per Urban Designer as compared to Vaughan.

In addition, Vaughan's Urban Designer also works on all of the items identified in the chart below on a daily basis, of which, the workload has increased significantly since 2003:

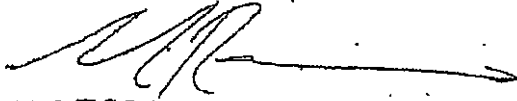

Total Number of Architectural/Urban Design Guidelines, Subdivision Landscape/Streetscape Plans, Environmental Reports Prepared by 4 Urban Designer staff members:

<i>Types of Files</i>	<i>Year</i>			
	<i>2003</i>	<i>2004</i>	<i>2005</i>	<i>2006</i>
<i>Site Plans</i>	192	192	179	189
<i>Urban Design Guidelines</i>	5	7	13	15
<i>Architectural Control Guidelines</i>	4	8	6	8
<i>Streetscape/Landscape Construction Drawings</i>	5	6	11	12
<i>Subdivision/Landscape Drawings</i>	21	34	43	66
<i>Subdivision Assumption Inspections</i>	19	26	36	39
<i>Subdivision Completion Approval insp.</i>	25	37	45	47
<i>Woodlot/Vegetation Assessments</i>	9	21	32	17
<i>Letters of Credit Release Inspections</i>	47	44	51	69
<i>Total</i>	322	375	416	462

The new complement of "Urban Designer" will ensure that the Department continues to provide quality customer service to our clients. The additional staff complement will allow the workload to be more evenly distributed among staff, thereby ensuring a higher quality of work, less overtime and fleu time claims per individual to complete time sensitive projects, and will ensure that work is processed within acceptable time lines.

If you have any questions, please call me.

Respectfully,

MARCO RAMUNNO

DEPARTMENT: Building Standards Department BUSINESS UNIT NUMBER: 110001

COMMISSIONER APPROVAL:

TO: John Henry, Acting Director of Budgeting and Financial Planning
FROM: Leo Grellette, Director of Building Standards Department
DATE: December 6, 2006
RE: New Complement Request - Plans Examiner 1 (Architectural)
(New Full-Time FTE)

Further to our conversation, the following is our justification for the conversion of the two (2) Part-Time Plans Examiner positions into one (1) Full-Time position

- The department was unable to successfully recruit part-time qualified staff. With recent amendments to the Ontario Building Code Act (Bill 124) only provincially qualified staff can examine plans submitted with building permit applications.
- The Part-Time salary offered by the City within the Part-Time Collective Agreement is not competitive in the market place. (Also, the salary offered in the Part-Time Collective Agreement equates to a salary less than provided for with the full-time City positions.)
- Part-Time examination staff would not be eligible for the Provincial or other approved Building Code Internship programs.
- Without the part-time Staff the department is finding it increasing difficult to consistently maintain service delivery times that are close to meeting the requirements of Bill 124 service delivery timelines. We believe that the continuous full-time position may well provide an equivalent work output to that of the two(2) part-time positions. This is particularly due to lack of interruptions in service delivery by the full-time position.
- The proposal represents a net savings of \$11,188

Should you have any questions please contact me at extension 8224.

Leo Grellette
Director of Building Standards Department

memorandum

CITY INTERNATIONAL PARTNERSHIPS
& BUSINESS DEVELOPMENT EFFORTS

Appendix VIII - Schedule U

Request for Increases in Expenses Other Than Allowable Increases

1) Description of the Increase

The purpose of the budget increase request for the Foreign Business Development account is to support the City's international partnerships and business development efforts.

Since 1991, the City of Vaughan has established an international presence through sister city relationships in 7 communities spanning Japan, China, Italy, Philippines and Israel. The purposes of these relationships are to promote economic development (i.e. expansion of market opportunities for local businesses); foster educational exchanges and build cultural ties. The maintenance of these relationships requires making and receiving visits to and from these cities on an ongoing basis. The 2006 Operating Budget was set at \$10K in recognition that 2006 was an election year and that there would be fewer exchange opportunities.

In addition to the sister city relationships, the City receives a number of incoming delegations from non-sister city locales. The unbudgeted expenditures from these delegations have an impact on department budgets.

In 2007, it is anticipated that there will be delegations travelling to Italy and Pacific Rim areas. The ETDD has also requested to explore partnership opportunities in the US.

2) Link to Vaughan Vision Objectives

This request is consistent with Vaughan Vision Goal A-4: Promote economic development.

3) Financial Impact

Detail the 2007 initial increase, full year impact, etc.

Current 2006 Operating Budget: \$10,000
Proposed 2007 Operating Budget: \$50,000

40,000

BUSINESS UNIT NUMBER: 1905008.7698 BUSINESS UNIT NAME: FOREIGN BUSINESS DEVELOPMENT

Appendix VII Schedule D

Request for Increases in Expenses Other Than Allowable Increases

a) Associated Benefits

E.g. service levels maintained, long-term cost savings, improved productivity, etc.

Requested budget will allow ETDD:

- To maintain and enhance an international presence within selected markets
- To deliver past service levels within established partnerships by maintaining a base level of contact and interaction with sister cities
- To assess economic development opportunities in new markets, i.e. US

b) Implications of Not Receiving the Requested Amount

- Foreign business development program languishes – lack of presence for Vaughan in international markets
- Maintenance of current international partnerships jeopardized
- Forego economic development opportunities – decreased assistance to Vaughan businesses in accessing international markets via local networks
- The current budget level does not provide for any significant delegation hosting beyond covering the costs of a meal and some transportation for the delegations.
- Outbound partnership events are not achievable with current budget since ETDD is required to cover staff travel costs, group transportation expenses, group meal expenses and other incidental fees.
- Required preparation of collateral materials for outbound visits, which require language translations, is not achievable with current budgets.

DEPARTMENT: <u>DEVELOPMENT / TRANSPORTATION ENGINEERING</u>	BUSINESS UNIT NUMBER: <u>2004001</u>
---	--------------------------------------

COMMISSIONER APPROVAL: 

**Schedule T
New Complement Request
Manager, Development Inspection and Grading
Development/Transportation Engineering Department**

Background

It is anticipated that 8,000-10,000 new homes will be built over the next few years. Lot grading review and approvals of applications (and subsequently associated homeowner complaints) need to be processed and dealt with. Approximately 60 – 80 subdivision agreements will be processed in 2006-2007. This is an increase of approximately 40% from the previous level. These subdivision agreements will need to be administered throughout the construction and building stages of the developments.

It is proposed that the four Municipal Service Inspectors associated with land development and presently assigned to the Engineering Services Department, be transferred to Development / Transportation Department along with the respective supervisory component related to this function. This move will provide better alignment of service focusing all inspection related duties for municipal services and lot grading control in one area. Similar job function and responsibilities in terms of subdivisions administration and site plan agreement will be resident in one area, under a single supervisor. Efficiencies of scale will also be realized as will staff and general public interrelationship.

Total Cost Being Requested

It is anticipated that additional revenue will be received through subdivision development agreements and new fees imposed on residential lot grading approval applications. This revenue from fees associated with lot grading approval processing is anticipated to be in the order of \$100,000 - \$200,000 per annum.

The New Complement and Total Cost Being Requested

Under the direction of the Director of Development / Transportation Engineering a Manager, Development Inspection and Grading (Grade 8 – Step 1) is requested as a new full time complement for the Development / Transportation Engineering Department.

The Manager, Development Inspection and Grading will provide direct guidance, support and assistance to current staff in order to implement new initiatives to better process grading approvals and subdivision administration. There will be a resulting increase in the level of customer service received by residents, business owners, developers and builders in the City of Vaughan associated with lot grading, letter of credit reductions / releases, and assumption requests.

The following core job responsibilities and associated key results of this position would be implemented to:

- Provide direct supervision for four Municipal Inspectors, three Lot Grading Coordinators and one Senior Engineering Assistant (Development).
- Perform development and subdivision servicing agreement administration including letter of credit reductions, completion approval processing and assumption requests.
- Offer enhanced service to new homeowners regarding lot grading complaints.
- Offer enhanced services to consultants and developers regarding subdivision construction.

Performance Measures / Statistical Analysis

The City of Vaughan is currently undergoing rapid development activities resulting in being one of the largest municipalities in the Region of York. In comparison to other local municipalities in the Region, we are experiencing one of the highest per annum rates of growth. A survey conducted of surrounding municipalities of similar size and growth including Brampton, Markham, Richmond Hill and Aurora shows that all these municipalities have a dedicated Lot Grading Supervisor coordinating the duties of the lot grading and development administration staff.

The municipal inspection, lot grading and development administration issues need to be effectively handled in order to provide quality customer service to our clients. The Manager in this role is required in order to deal with these issues in the Development / Transportation Engineering Department.

DEPARTMENT: DEVELOPMENT / TRANSPORTATION ENGINEERING BUSINESS UNIT NUMBER 2004001

COMMISSIONER APPROVAL: 

Schedule T
New Complement Request
Storm Drainage Engineer
Development/Transportation Engineering Department

Background

New legislation relating to environmental initiatives through the Ministry of Natural Resources, Ministry of the Environment and the Department of Fisheries and Oceans will make it incumbent upon the local municipalities to exercise due diligence with respect to the protection of the environment. In discussion with the Toronto Region Conservation Authority it is anticipated that certain requirements for storm water management, sediment and erosion control, fisheries habitat and wildlife protection will become increasingly more onerous on all levels of government and private developers. It is imperative that all local municipalities be informed of the current responsibilities and associated liabilities.

Currently, the City of Vaughan relies on the TRCA to undertake a majority of application reviews concerning storm water management issues related to development. The City of Vaughan is undergoing rapid development activities resulting in being one of the largest municipalities in the Region of York. Furthermore, the City will be expanding its urban boundaries to the City limits and it is imperative that new initiatives such as sub-watershed planning for these areas be done effectively. We are also assuming more storm water facilities as a result of urbanization of our greenfields.

Total Cost Being Requested

The total cost as described in the attached Schedule T for this position, Storm Drainage Engineer, is \$96,800. This cost includes an initial cost for computer hardware and software and office equipment. It is anticipated that the cost for the new FTE complement will be funded from the 3.5% of Engineering Fees; therefore, there will be no impact on taxation revenue for this position.

The New Complement and Total Cost Being Requested

Under the direction of the Manager of Development Services, the Storm Drainage Engineer (Grade 8 - Step 1) is requested as a new full time complement for the Development / Transportation Department.

This person will provide expertise in storm water management and drainage issues and liaise with various Ministries, Subcommittees and Agencies in order to address new initiatives and design standards in the operation and maintenance of existing City facilities and related matters such as the August 19, 2005 storm.

The following core job responsibilities and associated key results of this position would be implemented to provide:

- Storm water management development application review.
- City wide sub-watershed planning and water course analysis.
- Long-term maintenance and operations expertise for drainage pond facilities.

Performance Measures / Statistical Analysis

The City of Vaughan is currently undergoing rapid development activities and it is anticipated that this growth will continue, along with the expansion of the urban boundaries to the City limits, in the future.

In comparison to other local municipalities in the Region of York, the City of Vaughan is one of the few municipalities that currently has the Toronto Region Conservation Authority review storm water management matters relating to development applications on its behalf.

As well, pending legislation regarding sediment and erosion control and storm water management will increase the need for local municipalities to exercise increased due diligence in these drainage initiatives.

Appendix VI - Schedule U

Request for Increases in Expenses Other Than Allowable Increases

1) Description of the Increase

The Engineering Services Department uses AutoCAD software to facilitate the drafting and detailed design of Capital Engineering projects and contract construction drawings, drafting services for report attachments and survey base plan creation and Infrastructure Management. The version currently deployed within the department has not been upgraded since 2004 and will not be supported in the foreseeable future.

2) Link to Vaughan Vision Objectives

This additional funding request is directly aligned with Vaughan Vision 2007, B - Manage Our Resources, specifically, B3 - Revitalize Infrastructure where this software tool is used throughout the complete lifecycle of an Engineering Project from Preliminary Investigations, Design and Infrastructure Management, resulting in Engineering Design drawings that are issued for construction.

3) Financial Impact

The additional funding request is composed of an upgrade of our existing software licenses to the current version and annual maintenance fee for maintaining and support of the software from it's vendor. The department will need to carry annually, the maintenance fee for the software and in return the vendor will automatically upgrade our software as new versions are released and include support.

This is standard practice for the software industry and complies with our Information Technology Management Department's policy to keep software current, supported and aligned with corporate operating systems.

The funding being sought is as follows:

AutoCAD Software Upgrade

AutoCAD Land Desktop R-2005 - Upgrade To Land Desktop R-2007	\$1,770.00
AutoCAD LDD And Civil R-2005 - Upgrade To Civil 3D R-2007	\$17,010.00
AutoCAD Survey R-2005 - Upgrade To Survey R-2007	\$1,660.00
AutoCAD LT R-2005 - Upgrade To LT R-2007	\$1,950.00
	<u>\$22,390.00</u>

AutoCAD Software Maintenance Subscription

AutoCAD Land Desktop R-2007 - Maintenance Subscription	\$760.00
AutoCAD Civil 3D R-2007 - Maintenance Subscription	\$8,190.00
AutoCAD Survey R-2007 - Maintenance Subscription	\$300.00
AutoCAD LT R-2007 - Maintenance Subscription	\$1,150.00
	<u>\$10,400.00</u>

BUSINESS UNIT NUMBER: _____ BUSINESS UNIT NAME: Const. Eng. Serv.

[Handwritten Signature]

Appendix VII Schedule U

Request for Increases in Expenses Other Than Allowable Increases

4) Associated Benefits

The latest version of the software is designed to work within our current and future computer operating systems and environments where our current version is quickly becoming outdated as our corporate systems continue to upgrade.

Carrying the annual maintenance fee will save the City approximately \$11,000.00 in version upgrading fees annually.

5) Implications of Not Receiving the Requested Amount

Vendor support for an out of date version of software will be discontinued.

BUSINESS UNIT NUMBER: _____ BUSINESS UNIT NAME: _____

Appendix VII Schedule U

Request for Increases in Expenses Other Than Allowable Increases

6) Justification Measures

Performance is improved when software is synchronized with corporate operating systems designed to work in harmony resulting in efficiencies by Engineering staff that use the software and ITM staff that support its operation.

DEPARTMENT: Engineering Services

BUSINESS UNIT NUMBER 2054001

Handwritten signature/initials

September 7, 2006

TO: Gary Carroll
Director of Engineering Services

RE: 2007 Operating Budget
New Complement Request -- Schedule T
Traffic Analyst

The Traffic Engineering of the Engineering Services Section is seeking approval for a Traffic Analyst within the 2007 Operating Budget. This position is responsible for preparing Council reports, preparing resident responses, attending Public Meetings, working with Neighbourhood Traffic Calming Committees, assists in conducting traffic movement counts, radar studies, infiltration studies, sight restriction reviews, school crossing guard studies, the set-up of the Automated Traffic Recorders (ATR's) equipment, collection and input of the sign inventory/traffic calming measures/traffic signal facilities through the City's GIS program, the set-up of the radar message board program and other day-to-day traffic work.

The current workload in the Traffic Engineering Division requires this new position to meet and respond to City Council, Councillor requests, Resident requests and outside agencies in a timely fashion.

As the City continues to grow both in commercial and residential development, the amount of traffic studies has increased over the past several years that has lead to reduced response times. The summary below outlines the number of requests and the average response times per request.

Year	Number of Requests	Average Response Time
2003	133	3 months
2004	287	5 months
2005	276	7 months

NOTE: Traffic staff are restricted carrying out specific traffic studies due to the time of the year. For examples: Radar studies are not completed during the winter months of December/January/February and possibly part of March, turning movement counts are not completed during the summer months of July & August.

With the above noted restrictions the backlog of traffic studies are apparent and also lengthens the time for each particular request.

The overtime hours for Traffic staff have increased over the years as well and can be contributed to the number of requests received due to the City's growth in commercial and residential growth.

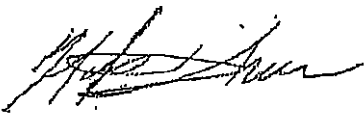

Attached is a copy of the overtime hours for each traffic position for the years 2004 and 2005. In this summary it also outlines the number of studies and hours that an outside agency did complete for Traffic Engineering to ensure responses were met in a timely fashion.

memorandum

This position is proposed to be a permanent full-time compliment within the Traffic Engineering Division at a 1 Full Time Equivalent (FTE), with a budget impact of approximately \$173,938.00 that will need to be budgeted annually.

As the City continues its commercial and residential development and to meet and respond to City Council, Councillor Requests, Resident requests and outside agencies in a timely fashion this position is essential.

Should you have any questions, please do not hesitate to contact the undersigned.

Mike Dokman, C.E.T.

DEPARTMENT: Public Works - Roads

BUSINESS UNIT NUMBER 231

COMMISSIONER APPROVAL: _____

To: Budget Committee

From: Brian T. Anthony
Director of Public Works

Subject: Additional Complement – Roads Division

I am writing to provide additional information with respect to the request for an increase in the Roads Division complement.

As has been shown by the Business Plan, the number of assumed kilometers of roads has increased by almost 20% over the past 5 years, and is expected to grow even more significantly with the development of the large 3 blocks in the eastern portion of the City.

While the kilometers of road to maintain has increased, staffing levels of employees have not increased. The failure to maintain adequate staffing levels has resulted in provision of some services at a level that does not meet the needs of the community, or provide adequate maintenance services to the road platform itself. In addition, the City is now under stricter regulations concerning the hours of work for its commercial drivers, and this especially impacts our winter operations.

In order to rectify this downward trend, the Manager of Roads Maintenance Services, along with the two Roads Supervisors, have identified a total of 3 additional staff are necessary. These staff consist of:

- 1 Equipment Operator II position
- 2 Equipment Operator I positions

These staff are needed to operate the large and medium sized vehicles necessary for such things as roadway sweeping, asphalt repairs, road grading, road ploughing, litter and debris clean-up, ditch and culvert maintenance, sign installation and repair, etc..

Without the necessary increase in staff to properly maintain the City's assets, the road platforms will steadily degrade to a point where more costly rehabilitation and reconstruction will occur earlier than is necessary, resulting in increased spending over the long run. For these reasons, I support the request for 3 additional permanent staff.

Brian T. Anthony, CRS-S, C. Tech
Director of Public Works

c.c. Angelo Siracusa, Manager of Road Maintenance Services

DEPARTMENT: Reserves & Investments BUSINESS UNIT NUMBER 070118

COMMISSIONER APPROVAL: _____

Date: August 16, 2006

To: Clayton Harris, Commissioner of Finance & Corporate Services

From: Ferruccio Castellarin, Director Reserves & Investments

Re: 2007 Operating Budget – Senior Analyst, Capital Assets & Reserves
New Complement Request Justification

Included in the 2007 Operating Budget submission for the Reserves & Investments department is a new complement request for a Senior Analyst, Capital Assets & Reserves. This position is required to develop, implement and maintain a city-wide fixed assets policy and reporting system to ensure compliance with the recently approved Public Sector Accounting Board (PSAB) standards. In addition, ongoing analysis and recommendations with respect to the future capital and reserve requirements associated with the renewal of these assets and multi-year capital plans will also be required.

Background to Accounting Standards Changes

In June 2006, the Public Sector Accounting Board (PSAB) approved the application of PS3150 Tangible Capital Assets to local governments and introduced a new accounting guideline Tangible Capital Assets of Local Governments. Under this application, local governments will now be required to report the value of city-wide assets including opening and closing book values, annual and accumulated depreciation, additions, disposals and write-downs in their financial statements beginning January 1, 2009. In order to comply with this date, it is estimated that we will require at least two years to complete our asset inventories and valuations and develop and implement the required policy and processes.

This position is required to expand the co-ordination effort currently underway to inventory and value assets city-wide and develop, implement and maintain guidelines including appropriate capitalization thresholds, depreciation methods (based on asset life cycles), valuation methods to be used where historical costs are not known and derive the related accounting transactions and financial reporting processes. This will also require an analysis of our existing computer applications to identify opportunities to leverage existing systems for these processes or recommend solutions where gaps are identified.

memorandum

As depreciation and replacement of these city-wide assets impacts future capital requirements, this position will also be responsible for updating and analyzing the multi-year capital plan, creating and analyzing individual and aggregate reserve continuity schedules and forecasts and updating the capital component of the long range financial planning model. Investments will also be analyzed and performed to maximize returns on available reserve balances.

Performance Measures

In the past ten years, the annual capital budget has increased from \$13.2 M to \$132.3 M (Table 1). After excluding the requirements for the new Civic Centre, the majority of the increase can be attributed to infrastructure repair and replacement (existing assets) and growth requirements (new assets). As both the existing and new assets age, the requirements to repair and replace them will continue to increase into the future.

Table 1: 10-Year Approved Capital Budget History (in \$ millions)

1996	1997	1998	1999	2000	2001	2002	2003	2004	2005
13,226	21,608	30,194	52,088	69,260	69,513	69,200	67,733	77,591	132,324

As the annual capital budget has increased so have the number and values of reserves maintained, deferred revenues collected (development charges, subdivider contributions) and reserve contribution requirements. Between 1996 and 2005, reserves and deferred revenues have increased from \$46.3 M to \$298.1 M (Table 2). As capital asset requirements continue to increase so will the future reserve requirements.

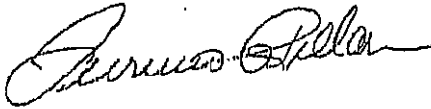

Table 2: 10-Year Reserves & Deferred Revenue History (in \$ millions)

1996	1997	1998	1999	2000	2001	2002	2003	2004	2005
46.3	68.4	77.7	75.8	203.4	227.8	250.1	256.7	273.2	298.1

During this ten year period of increased capital budgets and reserves maintenance, the capital and reserves section of the Reserves and Investments department has had only two support staff - one capital finance accountant and one capital payment clerk. The development, implementation and maintenance of the required policies, procedures and reporting to ensure compliance with the new PSAB accounting standards and the associated capital and reserve forecasts and analyses cannot be accommodated within

these two positions due to their existing workloads. A new full-time complement is required.

Sincerely,

Ferruccio Castellarin
Director of Reserves & Investments

DEPARTMENT: Engineering Services BUSINESS UNIT NUMBER 2054001

Revised Oct 27/06

COMMISSIONER APPROVAL: _____

The City Above Toronto

February 12, 2007

TO: Gary P. Carroll,
Director of Engineering Services

FROM: Denny S. Boskovski, C.E.T.
Supervisor, Infrastructure Management

RE: **2007 Operating Budget**
New Complement Request – Schedule T
P 13 Infrastructure Analyst
Convert Position from Permanent Part Time to Permanent Full Time

Background

The Infrastructure Management Services section of the Engineering Services Department is responsible for serving the infrastructure data and mapping requirements of all divisions within the Engineering and Public Works Departments by administering the Infrastructure Management (IM) Systems – including strategic planning, application development and implementation, project management, data collection, maintenance and strategic analysis and capital planning of Infrastructure through Life Cycle Cost Analysis.

The Infrastructure Analyst position coordinates and leads Infrastructure Management Projects including tasks such as inventory data and technology application and undertake advanced strategic analysis and maintain analysis systems (e.g. dTIMS CT).

The current workload for the existing position has been benchmarked in working hours annually at 2,065 hours. Current staffing levels permit only 936 hours to be spent on this function annually. Further detail is shown below under Performance Measures & Statistical Analysis.

The new complement request is to convert from a permanent part time position to a permanent full time position. The position is directly aligned with Vaughan Vision 2007, B - Manage Our Resources, specifically, B3 – Revitalize Infrastructure by undertaking the advanced strategic analysis (includes predictive modeling of future condition indices and optimization of maintenance and rehabilitation strategies) to determine proactive repair and replacement of infrastructure resulting in improved financial efficiency and return on investment through life cycle costing for all infrastructure asset classes.

This position undertakes the works required to comply with regulatory requirements for maintenance and replacement planning and reporting of various classes of infrastructure such as roads, bridges, structures, water and wastewater systems imposed by the Highway Traffic Act, the Bridges Act, Bill 175, The Sustainable Water & Sewerage Act and Public Sector Accounting Board PS3150. All of these regulations

memorandum

require on an ongoing basis that local governments develop an inventory of assets to be capitalized, determine original costs, calculate the accumulated depreciation from the time of acquisition, develop renewal/replacement strategies and develop policies and procedures to ensure that asset information is accurately recorded on a continuing basis.

Total Cost Being Requested

The conversion of this position from permanent part time to permanent full time equates to an increase in FTE of 0.314. The associated costs are broken down as follows:

Full Time Salary	\$54,780
Full Time Benefits	\$13,970
Computer Equipment	\$0
Office Equipment And Furniture	\$0
Other Expenses	\$0
Offsetting Expenditure Reductions (Part Time Salaries, Professional Fees, Etc.)	(\$39,860)
Total Cost in 2007	<u>\$28,890</u>

The position is proposed to be a permanent, full time compliment, therefore the above noted increase of \$24,415 will need to be budgeted annually.

Benefits & Savings

The additional FTE of 0.314 will complete the structure of the Infrastructure Management Services section and permit the position to function within the section's framework unabated. The position will be able to complete Life Cycle Cost Analysis for all classes of assets annually and produce Maintenance and Rehabilitative Programs for implementation in future Capital Budgets as per Vaughan Vision 2007, B - Manage Our Resources, specifically, B3 - Revitalize Infrastructure.

Performance Measures & Statistical Analysis

The chart below is an excerpt from the Engineering Services Business Plan and illustrates the shortfall of manpower required the keep our Infrastructure Management System current and serving the Commission and Corporation.

Should you have any questions or comments regarding this proposal, please feel free to contact the undersigned at anytime to discuss.

Yours truly,

Denny S. Boskovski, C.E.T.
 Supervisor, Infrastructure Management

UNDERGROUND STREETLIGHT POWER
SUPPLY LOCATES

The City Above Toronto

Appendix VII- Schedule U

**Request for Increases in Expenses
Other Than Allowable Increases**

1) Description of the Increase

The request is for \$450,000, and is to cover the cost of providing underground street light power supply locates to companies and residents excavating or performing work within the City's road allowance.

As per the Occupational Health & Safety Act, Ontario Regulation 213/91 (as amended), Section 228 requires "The owner who is responsible for the excavation shall request the owner of the service to locate and mark the service."

The City owns the street light system, and as such, we are being contacted to provide locates for the underground power supply.

2) Link to Vaughan Vision Objectives

This ties into Vaughan Vision:

- 1, Pursue Excellence in the Delivery of Core Services; and,
- 2, Promote Community Safety, Health & Wellness

3) Financial Impact

Detail the 2007 initial increase, full year impact, etc.

It is estimated that over 15,000 requests for locates will be received. Based on experience to date, the average cost per locate is \$30. This translates into approximately \$450,000 per year.

The actual annual cost will depend on the number of locates requested.

BUSINESS UNIT NUMBER: 2310225.7331 BUSINESS UNIT NAME : Streetlight Maintenance

PW - Roads

Appendix VII - Schedule U

Request for Increases in Expenses Other Than Allowable Increases

4) Associated Benefits

E.g. service levels maintained, long-term cost savings, improved productivity, etc.

The benefits are that the City will comply with its obligation to provide locates of its underground streetlight power supply cables, thereby reducing the chance of electrocution or injury to those residents and contractors doing work in the City's road allowance.

This may also have a beneficial impact on reduced damage to the street light power supply cables, resulting in a system with less power outages and potentially less repairs.

5) Implications of Not Receiving the Requested Amount

The City will not be able to provide locates for its power supply cables to the street lights, and thereby may open itself up to costly litigation should someone get electrocuted or injured as a result thereof.

6) Justification Measures

Provide statistical analysis, performance measures & comparisons which demonstrate the need for the request.

As previously noted, Regulation 213/91 Section 228 clearly outlines the need for this request.

Notwithstanding the above, the following e-mail from Paul Rossi – PowerStream, indicates why they will not/cannot perform this service:

Rob,

Thank-you for your e-mail and for the information provided.

PowerStream as an LDC has to comply with OEB regulations. For some time there has been a debate as to whether or not an LDC such as PowerStream could provide street lighting services within the regulatory framework, in particular the Ontario Energy Board's Affiliate Relationships Code. The Ontario Energy Board has now, through its Chief Compliance Officer (CCO), made it clear that LDCs can not provide such services from their regulated business.

Daily where PowerStream is currently being paid to provide such service, we have served notice of termination. With PowerStream aware of the OEB's decision it cannot now knowingly undertake to accept

The City Above Toronto

to perform this type of work. Hence, I will be returning a copy of the faxed street light cable locate requests, numbering 106 in total, that PowerStream recently received from your contractor, Langley Utilities Contracting.

If you need further information or clarification please do not hesitate to call or write.

Regards,
Paul

Appendix VII: Schedule V

New Initiatives/Service Level Adjustments Business Case

1) The Opportunity, Initiative or Option

Briefly outline the opportunity, initiative or option and describe why it is required. (E.g. service adjustment, service added, new initiatives etc.)

Strategic Plan Published Document

The initiative is to publish a strategic plan document which will incorporate the revised Vaughan Vision 2007 including the City's vision, values, principles, strategic goals, strategic objectives, and key strategic initiatives all in one document.

2) Link to the Vaughan Vision

Detail how the opportunity, initiative or option links with the Vaughan Vision Objectives. (2007 Vaughan Vision Map is included in Business Planning Instructions for reference purposes)

This opportunity is linked to the Vaughan Vision in that the formal document which will be produced will showcase the revised Vaughan Vision 2007.

3) Stakeholder Impact

Detail if internal and external stakeholders are impacted by the opportunity, new initiative or option.

Council and Senior Management have scheduled a strategic planning workshop in March 2007 which will be an opportunity to discuss revising the Vaughan Vision 2007. In support of this process extensive consultation with City staff and external community stakeholders will be implemented which will ensure that a wide diversity of stakeholders are involved in developing the revised Vaughan Vision. The culmination of this process will be the formal publishing of a City of Vaughan strategic planning document which will act as a resource and reference for Council, senior management, City staff and external stakeholders.

Appendix VII-Schedule V

**New Initiatives/Service Level Adjustments
Business Case**

4) Economic Impact: Cost/Benefit Analysis

Detail the financial & non-financial costs and benefits for the new initiative, opportunity or option.

Costs: (\$ dollars)

2007 operating costs to implement

- printing costs approx. \$7,000 for 10,000 copies based on a quote for the Economic Development Annual report
- designer costs approx. \$11,000
- photographer costs approx. 2,000

Total: **\$20,000**

2008 Full year Impact

N/A

Other: Detail additional future cost requirements and any non-financial costs

Benefits: Specifically outline the benefits e.g. Cost savings, revenues, value-added services, improved service, efficiencies, other.

The benefits of producing a consolidated City of Vaughan strategic planning document will be to ensure the existence of a reference document to guide Council, senior management and staff in the delivery of City services as well as to inform external stakeholders as to the City's strategic vision, goals, objectives and key initiatives.

Conclude as to why it is beneficial to act on the new initiative, opportunity or option

Along with the aforementioned benefits producing a strategic plan document will ensure the City of Vaughan is positioned as a leading municipality in the strategic planning field as surrounding municipalities in the Greater Toronto Area (GTA) have also produced a strategic plan document.

New Initiatives/Service Level Adjustments Business Case

5) Consequences for not Carrying Out the Initiative, Opportunity or Option

Briefly illustrate the impacts for not carrying out the initiative, opportunity or option.

If a formalized strategic planning document is not implemented the result will be confusion and lack of clarification amongst internal and external stakeholders as to what is the City corporation's strategic plan due to an inability to reference a strategic planning document. This situation currently exists as no formal strategic planning document was published in the past. As well not having a strategic planning document to provide to interested individuals or groups diminishes the image of the municipality since other surrounding Greater Toronto Area (GTA) municipalities have all published a strategic plan document.

6) Performance Success Measures

Detail performance measures which will evaluate the success or failure of the opportunity, initiative or option in meeting Vaughan Vision Objective (Measure does not have to be in numerator/ denominator form).

A measure of success is the successful completion of the Vaughan Vision 2007 revision. The strategic planning document is the deliverable associated with this process.

7) Timelines (Implementation & Full Rollout)

Detail the time lines associated with the opportunity, initiative or option. Ensure it includes all stages including implementation and full rollout.

The revision of the Vaughan Vision 2007 is expected to be completed in the fall of 2007. Thus, printing and circulation of a strategic planning document is planned for December 2007.

ADDITIONAL INFORMATION
ITEM NO. **3**
Report No. **1** Council **29/1/07**
Strategic Planning Committee

January 26, 2007

To: Mayor and Members of Council

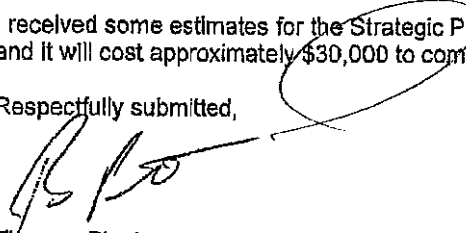

From: Thomas Plant
Senior Manager Of Strategic Planning

RE: **ADDITIONAL INFORMATION**
Strategic Planning Committee of January 23, 2007.

At the Strategic Planning Committee meeting on Tuesday January 23rd there was a request for staff to obtain cost information on completing a citizen survey as part of the Vaughan Vision 2007 review.

I received some estimates for the Strategic Planning survey cost as directed by the committee and it will cost approximately \$30,000 to complete the survey.

Respectfully submitted,

Thomas Plant
Senior Manager Of Strategic Planning

memorandum

RECEIVED

Appendix VI - Schedule B

Request for Increases in Expenses Other Than Allowable Increases

1) Description of the Increase

A) Purchase of A Blackberry Unit for Licensing Enforcement in the field and Air Time Charges related thereto.

2) Link to Vaughan Vision Objectives

A) Service Delivery Excellence 1.1 - Improve community safety through design, prevention, Enforcement and Education.

1.1.6 - Review level of enforcement, compliance and monitoring of regulations relating to public safety.

3) Financial Impact

Detail the 2007 initial increase, full year impact, etc.

A) The cost of Blackberry is \$100.00, Acct# 060082.7120.03 monthly charges
Acct# 060082.7122.01 for airtime equal \$40.00 x 12 = \$480.00

Total Cost In Year One = \$580.00

060082.7122.01 - CELLULAR LINE CHARGES

The City Above Toronto

Appendix VII - Schedule U

Request for Increases in Expenses Other Than Allowable Increases

B) Associated Benefits

E.g. service levels maintained, long-term cost savings, improved productivity, etc.

- A) The purchase of The Blackberry will allow an Enforcement Officer in the field to access up to date information on the Licensing status of any business operating in Vaughan. In addition, for mobile licences such as Tow Trucks, Taxi Cabs, Refreshment Vehicles Etc. An Enforcement Officer will be able to access Licensing particulars as well as a photo of the licensee for purposes of identification. The use of The Blackberry will allow the officer to be more productive in the field as up to date information will be available and an informed decision can be made with respect to possible charges being laid pursuant to the By-Law.

C) Implications of Not Receiving the Requested Amount

- A) In the event this request is not approved Enforcement staff will be obliged to contact an employee of the Licensing Section to provide Licencing information. This will take the person away from his/her regular duties. In order to obtain the information the process is time consuming and puts the officer in the field in a position of having to detain a licensee. At times licensing staff may not be available to obtain the information in a timely manner if they are serving customers at the counter. Result is downtime for all involved resulting in inefficiency.

BUSINESS UNIT NUMBER: _____

BUSINESS UNIT NAME: Clerks - Licensing

The City Above Toronto

Appendix VII Schedule B

Request for Increases in Expenses Other Than Allowable Increases

6) Justification/Measures

Provide statistical analysis, performance measures & comparisons which demonstrate the need for the request.

- A) Accessing information from the Blackberry in the field is more productive than having to call the office for information. Productivity in the field will be increased as the Enforcement Officer will be able to attend to a great many more calls.

7) Other Relevant Comments

- A) Enforcement Services is making a similar request for Blackberry units to be used by Enforcement Officers in the field.

BUSINESS UNIT NUMBER: _____

BUSINESS UNIT NAME: Clerks Licensing

REAL TIME DATA EXTRACTION BLACKB & TIME FOR FIELD WORKERS

Appendix VII - Schedule V

New Initiatives/Service Level Adjustments Business Case

1) The Opportunity, Initiative or Option

Briefly outline the opportunity, initiative or option and describe why it is required. (E.g. service adjustment, service added, new Initiatives etc.)

STAFF IN THE FIELD ARE TO BE EQUIPPED WITH BLACKBERRY DEVICES TO IMPROVE EFFICIENCY, THEREFORE INCREASING CUSTOMER SERVICE. THESE DEVICES WILL PERMIT THE SUBMITTING OF LICENSING RECORDS, INPUTTING OF NOTES INTO CITE REAL TIME, AND ULTIMATELY ALLOW PARKING TICKETS TO BE ISSUED. THIS EFFICIENCY INCREASE WILL BE APPROXIMATELY 1-2 HOURS PER FIELD OFFICER PER DAY.

2) Link to the Vaughan Vision

Detail how the opportunity, initiative or option links with the Vaughan Vision Objectives. (2007 Vaughan Vision Map is included in Business Planning Instructions for reference purposes)

- PURSUE EXCELLENCE IN THE DELIVERY OF CORE SERVICES
- ENHANCE PRODUCTIVITY & COST EFFECTIVENESS
- DEVELOP INTERNAL COLLABORATIVE SOLUTIONS
- ENHANCE TECHNOLOGY & PURSUE INNOVATION

3) Stakeholder Impact

Detail if internal and external stakeholders are impacted by the opportunity, new initiative or option.

BOTH INTERNAL & EXTERNAL STAKE HOLDERS WILL BE POSITIVELY IMPACTED

Appendix VII- Schedule V

New Initiatives/Service Level Adjustments Business Case

1) The Opportunity, Initiative or Option

Briefly outline the opportunity, initiative or option and describe why it is required. (E.g. service adjustment, service added, new initiatives etc.)

The City is required to have a First Attendance Facilitator/Adjudicator to provide a first step for people to dispute parking tickets. This is set out in the Provincial Offences Act.

Having this position increases customer service as it diverts potential parking tickets away from the courts. It also allows people to dispute parking tickets after regular business hours and in a less formal atmosphere. This also prevents a negative impact on productivity by having officers in court for longer periods.

Revenue received faster

2) Link to the Vaughan Vision

Detail how the opportunity, initiative or option links with the Vaughan Vision Objectives. (2007 Vaughan Vision Map is included in Business Planning Instructions for reference purposes)

A-1 Pursue Excellence in the Delivery of Core Services

B-2 Expanded Revenues

D-1 Enhance Productivity

3) Stakeholder Impact

Detail if internal and external stakeholders are impacted by the opportunity, new initiative or option.

Impacts of this initiative on stakeholders are positive:

- Better levels of service for both internal and external groups
-

BUSINESS UNIT NUMBER: 080142 BUSINESS UNIT NAME: ENFORCEMENT

Appendix VII-Schedule V

New Initiatives/Service Level Adjustments Business Case

4) Economic Impact: Cost/Benefit Analysis

Detail the financial & non-financial costs and benefits for the new initiative, opportunity or option.

Costs:	(\$ dollars)
2007 operating costs to implement	\$61,400
2008 Full year Impact	\$61,400
Associated Capital costs:	0
Other: Detail additional future cost requirements and any non-financial costs	0

Benefits: Specifically outline the benefits e.g. Cost savings, revenues, value-added services, improved service, efficiencies, other.

Increased efficiencies, Increased public Service, increased service hours, potentially faster revenue

Conclude as to why it is beneficial to act on the new initiative, opportunity or option

This initiative provides for a mandated position to deal with parking ticket disputes, while increasing customer service and dispute availability. By not having this process, the revenue stream will be slowed significantly.

BUSINESS UNIT NUMBER: _____ BUSINESS UNIT NAME : _____

Appendix VI - Schedule V

New Initiatives/Service Level Adjustments Business Case

5) Consequences for not Carrying Out the Initiative, Opportunity or Option

Briefly illustrate the impacts for not carrying out the initiative, opportunity or option.

Decrease in customer service

Increase in court time

Revenue received slower as all disputed tickets heard in Provincial Court. Most trials are 9-15 months after the offence date.

6) Performance Success Measures

Detail performance measures which will evaluate the success or failure of the opportunity, initiative or option in meeting Vaughan Vision Objective (Measure does not have to be in numerator/ denominator form).

Number of parking tickets being disputed in court

Positive customer feedback for after hours availability

7) Timelines (Implementation & Full Rollout)

Detail the time lines associated with the opportunity, initiative or option. Ensure it includes all stages including implementation and full rollout.

Shortly after budget approval. Job Description will need to be finalized, competition held and new incumbent trained.

INTRODUCTION OF A CORPORATE TRAINING & DEVELOPEMENT PROGRAM

Appendix VII- Schedule U

**Request for Increases in Expenses
Other Than Allowable Increases**

1) Description of the Increase

Introduction of a Corporate Training & Development program through Schulich Executive Education Centre. This will include the following programs:

- Masters Certificate in Municipal Management
- Certificate in Management Skills for Supervisors
- Supervision 101 – Supervisory Leadership Skills
- Managing in a Unionized Environment

The purpose of this program is to enhance the knowledge skills and abilities of Vaughan supervisors / managers and consequently dramatically enhance operational performance levels.

2) Link to Vaughan Vision Objectives

- C-1 : Encourage Staff Learning and Growth
- C-2 : Attract Retain and Promote Skilled Staff
- C-3 : Built Positive Staff Morale

3) Financial Impact

The cost per participant in the program is \$255. per day

We propose that a budget of \$40,000 be approved to cover the costs associated with this program. The payment of the tuition will be a shared responsibility between the employee's department and the funds allocated through the human resources budget. We anticipate having at least 40-60 staff trained during 2007.

BUSINESS UNIT NUMBER: _____ BUSINESS UNIT NAME : _____

Human Resources

Appendix VII- Schedule U

Request for Increases in Expenses Other Than Allowable Increases

4) Associated Benefits

Benefits:

Develop leadership and teambuilding skills for existing leaders and those aspiring to lead.
Build critical management skills in the areas of interpersonal dynamics and improving operational performance
Create a high level of motivation for participants and ensure skills learned are put into immediate practice

5) Implications of Not Receiving the Requested Amount

Our ability to fulfill the Vaughan Vision objectives will be severely compromised.

- C-1 : Encourage Staff Learning and Growth
- C-2 : Attract Retain and Promote Skilled Staff
- C-3 : Built Positive Staff Morale

BUSINESS UNIT NUMBER: _____ BUSINESS UNIT NAME : _____

Human Resources

Appendix VII- Schedule U

Request for Increases in Expenses Other Than Allowable Increases

6) Justification Measures

Examples of labour savings include:

- reduced duplication of effort
- less time spent correcting mistakes
- faster access to information
- lower staff turnover, reflected in lower recruitment and training costs

Examples of productivity increases include:

- improved methodologies reducing the effort required
- higher levels of skill leading to faster work and decision making
- higher levels of motivation leading to increased effort

7) Other Relevant Comments

Training and Development is a significant recruitment and retention factor in most organizations. Vaughan is turning a corner in becoming a larger organization with many challenges. Preparing our human capital in dealing with those challenges is through appropriate leadership training from a recognized institution. We have a package which can be provided outlining the details on the proposed program.

BUSINESS UNIT NUMBER: _____ BUSINESS UNIT NAME : _____

RECORDS MANAGEMENT SOFTWARE

Appendix VII- Schedule V

New Initiatives/Service Level Adjustments Business Case

1) The Opportunity, Initiative or Option

Briefly outline the opportunity, initiative or option and describe why it is required. (E.g. service adjustment, service added, new initiatives etc.)

To create a Records Management Software/EDMS Support Analyst position within the Records Management Division.

In 1991, the Records Management Division managed 4,272 records storage boxes. In 2005, the Records Management Division managed about 20,910 records storage boxes. The volume of records storage boxes being managed has increased by about 400 percent since 1991. A Regional Municipality of York study determined that paper records are increasing at a rate of about 22 percent per year. From 1991 to 2005, the volume of hardcopy records being created by the City of Vaughan has increased at an annual rate of 26 percent. The records storage boxes have been identified to the records series level. Some records storage boxes have been identified to the file folder level. Additional staff resources are required to assist with the management of these records in accordance with accepted Records Management best practices.

2) Link to the Vaughan Vision

Detail how the opportunity, initiative or option links with the Vaughan Vision Objectives. (2007 Vaughan Vision Map is included in Business Planning Instructions for reference purposes)

This initiative is linked to the Vaughan Vision in two ways.

1. Item A – to serve our citizens and Item A1 – to pursue excellence in the delivery of core services – Records Management is mandated by the Municipal Act.
2. Item D – to run our City and Item D-1 – to enhance productivity and cost effectiveness.

3) Stakeholder Impact

Detail if internal and external stakeholders are impacted by the opportunity, new initiative or option.

This added workload is having an adverse effect on the Records Management Program as the Records Management Supervisor must allocate so much of his time to routine administrative Records Management responsibilities. The lack of staff and limited financial resources is affecting our ability to improve our Records Management Program. One gauge of an organization's information maturity is how it views records and information. We must be committed to the management of recorded information throughout its total life cycle, from its creation, through its use, storage, and retrieval, to its final disposition. The first prerequisite for a successful Records Management Program is to view information as an asset to be managed in the same way as facilities, personnel, and vehicles are managed. Adequate financial resources, including staff, should be allocated to improve our Records Management Program. In conclusion, there is enough available work to justify the creation of an additional Records Management Software/EDMS Support Analyst position within the Records Management Division.

4) Economic Impact/Cost/Benefit Analysis

Detail the financial & non-financial costs and benefits for the new initiative, opportunity or option.

Costs:

(\$ dollars)

2007 operating costs to implement

Total Cost Being Requested

This complement request is projected to cost the City of Vaughan about \$67,030.00. This position is shown as a level "H" on the salary grid. This cost estimate includes salary and benefits. Additional computer equipment and a telephone line are required to support this position. If approved, the Job Evaluation Committee will determine the actual job classification level on the salary grid.

2008 Full year impact

This complement request is projected to cost the City of Vaughan about \$67,030.00, subject to inflation and a cost of living increase. This position is shown as a level "H" on the salary grid. This cost estimate includes salary and benefits. A new computer and a new telephone line will be needed in the Records Management Division to fill this position. If approved, the Job Evaluation Committee will determine the actual job classification level on the salary grid.

Associated Capital costs:

N/A

Other: Detail additional future cost requirements and any non-financial costs

N/A

Benefits: Specifically outline the benefits e.g. Cost savings, revenues, value-added services, improved service, efficiencies, other.

Conclude as to why it is beneficial to act on the new initiative, opportunity or option

Benefits and Savings

A recent industry study has found that a typical corporation with 1,000 knowledge workers wastes \$2.5 million to \$3.5 million per year searching for non-existent information, failing to find existing information or recreating information that cannot be found (International Data Corporation (Canada) Ltd.). Specifically, knowledge workers (i.e. clerical level and up) spend about 20% of their time managing documents (including versioning, approvals, annotations, etc.); the average office worker has a 34-hour paper backlog; mismanaged documents waste as much as 15% of an organization's revenue in hidden costs, with professionals/managers spending 7.4% of their time just searching for lost or misfiled information, and recreating a single misfiled or lost document costs \$120-\$250. Furthermore, 65% of office workers spend more than 2-hours per day on e-mail tasks. As the City of Vaughan employs approximately 500 office staff or knowledge workers, the results of this study suggest that City staff waste about \$1.25 million to \$1.75 million per year searching for misplaced or non-existent records, or recreating information that cannot be found. Approval of this complement request will help to improve our Records Management Program and reduce costs in these areas.

Approval of this position would provide staff resources to commence Versatile Enterprise Records Management software training for City staff. City staff would be able to enter data about active department records into the Enterprise database. City staff could generate their own file folder and bar code labels for file folders. City staff would be able to electronically search for records in the Records Centre by performing a keyword search. Staff would then be able to electronically request these records. Departments would be able to have access to information on any given topic in order to make an informed business decision. The City creates new records on an annual basis. Descriptive data about the newly created records must be entered into the database each year.

The Records Management Software/EDMS Support Analyst position could also assist the Records Management Supervisor with EDMS functions associated with the implementation of an EDMS/Enterprise Content Management Solution.

Appendix VII - Schedule V

New Initiatives/Service Level Adjustments Business Case

5) Consequences for not Carrying Out the Initiative, Opportunity or Option

Briefly illustrate the impacts for not carrying out the initiative, opportunity or option.

This added workload is having an adverse effect on the Records Management Program as the Records Management Supervisor must allocate so much of his time to routine Records Management responsibilities. Lack of staff and limited financial resources is affecting our ability to improve our Records Management Program. One gauge of an organization's information maturity is how it views records and information. We must be committed to the management of recorded information throughout its total life cycle, from its creation, through its use, storage, and retrieval, to its final disposition. The first prerequisite for a successful Records Management Program **is to view information as an asset** to be managed in the same way as facilities, personnel, and vehicles are managed. Adequate financial resources, including staff, should be allocated to improve our Records Management Program. In conclusion, there is enough available work to justify the creation of an additional Records Management Software/EDMS Support Analyst position within the Records Management Division.

6) Performance Success Measures

Detail performance measures which will evaluate the success or failure of the opportunity, initiative or option in meeting Vaughan Vision Objective (Measure does not have to be in numerator/ denominator form).

Performance Measurement and Statistical Analysis

Comparison with Other Municipalities

The City of Vaughan's Records Management Division needs additional staff resources. A Regional Municipality of York study was completed in 2006 to compare the Records Management Program staffing level to the population for various Municipalities in Ontario. The results are shown below:

<u>NAME OF MUNICIPALITY</u>	<u>2006 POPULATION</u>	<u>2006 NUMBER OF RECORDS STAFF</u>	<u>2006 POPULATION/ STAFF RATIO</u>
City of Ottawa	854,000	59 F.T.E.	14,475:1
City of Toronto	2,500,000	108 F.T.E.	23,148:1
City of Mississauga	680,000	25 F.T.E.	27,200:1
City of Thunder Bay	160,880	5 F.T.E.	32,176:1
Town of Newmarket	75,000	2 F.T.E.	37,500:1
Town of Georgina	45,134	1 F.T.E.	45,134:1
City of Hamilton	662,401	14 F.T.E.	47,314:1
City of Vaughan	250,000	3 F.T.E.	83,333:1

Records Management

The average Records Management staffing level to population for the eight Municipalities is 38,785:1. Toronto and Mississauga have a Records Management staffing level to population of about 25,174:1. Vaughan has a population to staff ratio of 83,333:1.

Based on the average Records Management to population staffing ratio for these eight Municipalities, Vaughan should have 6.44 Records Management positions as shown below:

250,000 population / 38,785:1 average ratio = 6.44 F.T.E.

Based on the Records Management to population staffing ratio for the York Region Municipalities (Georgina and Newmarket), Vaughan should have 6.05 Records Management positions as shown below:

250,000 population / 41,317:1 average ratio = 6.05 F.T.E.

Based on the Records Management to population staffing ratio for the Greater Toronto Area Municipalities with established Records Management Programs (Toronto and Mississauga), Vaughan should have 9.93 Records Management positions as shown below:

250,000 population / 25,174:1 average ratio = 9.93 F.T.E.

These calculations, based on the Records Management staffing level for these Municipalities, indicate that the City of Vaughan should have between 6 and 9 Records Management and Archives staff.

7) Timelines (Implementation & Full Rollout)

Detail the time lines associated with the opportunity, initiative or option. Ensure it includes all stages including implementation and full rollout.

This request is submitted as part of the 2007 budget process. The request is subject to departmental, SMT and Council approval. The request is also subject to the budget approval timelines as established by the Financial Services Department.

PART TIME CULTURAL HERITAGE COORDINATOR

Appendix VII - Schedule V

New Initiatives/Service Level Adjustments Business Case

1) The Opportunity, Initiative or Option

Briefly outline the opportunity, initiative or option and describe why it is required. (E.g. service adjustment, service added, new initiatives etc.)

The need for an additional part-time Cultural Heritage Coordinator staff person is related to the implementation of the Maple Heritage Conservation District (reviewed and to be approved by the Committee of the Whole Agenda Report, December 11, 2006 Item 42).

The approval of the Maple Heritage Conservation District would result in the City having a total of three (3) heritage conservation districts (in addition to existing Heritage Districts of Thornhill and Kleinburg-Nashville). The requirements of a Part V or District Designation under the Ontario Heritage Act necessitates that all properties, heritage or contemporary, within a District, require application and approval under the Heritage Permit process for any changes or additions to the exterior of these properties. Culture staff are required to undertake a review of all changes to properties to assess whether they conform to the Heritage District Design Guidelines and issue Heritage Permit approvals either via Heritage Vaughan, Council or at the staff level (for minor changes) to property owners. The total number of properties now designated under Part V as a result of a third District will be approximately 467 properties.

At this time, one staff person is responsible for the Heritage Permit process in Vaughan: the Cultural Heritage Coordinator within Cultural Services Division. In addition, the position is responsible for other duties such as processing archeological clearances and requesting archeological assessments. Reviewing all development applications applied for through our Planning Department to assess whether heritage properties are impacted and make recommendations on the same. Administers the City's heritage property grant program. Prepares assessment reports, agendas and recommendations for Heritage Vaughan committee's review and approval. (Heritage Vaughan is a Council appointed statutory advisory committee as legislated through the Ontario Heritage Act). Identifies, assesses and prepares reports on heritage property in Vaughan. Also, the position coordinates the various heritage events and programs offered through the division.

An initial assessment has concluded that the current work load of the Cultural Heritage Coordinator is at maximum capacity and with the new Maple district the work load will only increase as it relates to work associated with the Heritage Permits to be reviewed for the Maple area.

In order to assure a level of customer services required within the City services, additional staff resources will be required. The delay of Heritage Permits can hold up other permits such as Building Permits and development planning approvals through the Planning Department.

Cultural Serv

2) Link to the Vaughan Vision

Detail how the opportunity, initiative or option links with the Vaughan Vision Objectives. (2007 Vaughan Vision Map is included in Business Planning instructions for reference purposes)

Section 4.6 of the Vaughan Vision encourages the preservation and enhancement of the natural and built heritage environment and encourages the preservation of significant historical structures and communities.

3) Stakeholder Impact

Detail if internal and external stakeholders are impacted by the opportunity, new initiative or option.

In order to assure a level of customer services required within the City services, additional staff resources will be required. The delay of Heritage Permits can hold up other permits such as Building Permits and development planning approvals through the Planning Department.

DEPARTMENT: CULTURAL SERVICES, DEPARTMENT OF RECREATI BUSINESS UNIT NUMBER 210001

COMMISSIONER APPROVAL: _____

December 18, 2006

From: Angela Palermo
Manager, Cultural Services

Re: New Complement Request: Part-time Cultural Heritage Coordinator

A Part-time Cultural Heritage Coordinator has been requested and approved to be included in the 2007 Budget as directed by Council at their meeting of December 18, 2006 (Re: Maple Heritage Conservation District Item).

The request comes as the new Maple Heritage Conservation District comes into affect with the approval by Council on December 18, 2006 of the District and its guidelines. This new heritage conservation district will be the third district as designated under Part V of the Ontario Heritage Act within the City of Vaughan. The Department of Recreation and Culture has identified the need for an additional part-time Heritage Coordinator in order to administer the Heritage Permit approval process related to the implementation of the Maple Heritage Conservation District in addition to existing Heritage Districts of Thornhill and Kleinburg-Nashville. The total number of properties now designated under Part V as a result of a third District will be approximately 467 properties.

The requirements of a Part V or District Designation under the Ontario Heritage Act necessitates that all properties, heritage or contemporary, within a District require application and approval under the Heritage Permit process for any changes or additions to the exterior of these properties. Culture staff are required to undertake a review of all changes to properties to assess whether they conform to the Heritage District Design Guidelines and issue Heritage Permit approvals either via Heritage Vaughan, Council or at the staff level (for minor changes) to property owners.

The part-time position is proposed as a Level 7 (part-time union rating) and a new job description that encompasses the job responsibilities is also attached that outlines the job functions of the position. In summary, the basic job function will be to review Heritage Permit applications related to the heritage conservation districts in Vaughan and assess heritage properties and make recommendations on the same.

attach.

memorandum

JOB DESCRIPTION

CT 32

CORPORATION OF THE CITY OF VAUGHAN

- I. **POSITION:** PART-TIME CULTURAL HERITAGE COORDINATOR
- II. **SUPERVISOR:** MANAGER OF CULTURAL SERVICES
- III. **DEPARTMENT:** RECREATION AND CULTURE DEPARTMENT
- IV. **DATE WRITTEN:** DECEMBER 6, 2006
- V. **DATE EVALUATED:**
- VI. **BASIC JOB FUNCTIONS:**

Responsible for identifying, researching and evaluating properties of architectural and / or historical significance; preparing building evaluation and designation reports, as assigned; and reviews and issues Heritage Permit applications as it relates to the City's Heritage Conservation Districts. Provides recommendations on the administration, assessment and preservation of the City's heritage and cultural resources. Develops and implements cultural heritage programs in the community.

VII. **JOB RESPONSIBILITIES:**

1. Reviews and comments on development and / or re-development proposals and inquiries as related to Vaughan's Heritage Programs including Heritage Permits as it relates to the City's Heritage Conservation Districts.
2. Inspects properties to determine architectural and/or historical significance and makes recommendations with respect to designation and preservation.
3. Interprets and implements the Ontario Heritage Act as it relates to identification, preservation and designation of heritage properties including prepares by-laws and notices for publication, maintains the City's Register of Designated Buildings, as required under the Act and maintains and revises the City's Inventory of architecturally and/or historically significant buildings.
4. Reviews and evaluates applications from property owners for funding from municipal and provincial programs including researching; identifies and secures government grants etc., monitors resulting work to ensure compliance and completion of the program(s) guidelines and preservation standards and ensures necessary follow-ups and reporting requirements are completed.
7. Plans and coordinates promotional and marketing activities / events including preparation of

- press releases, and displays to encourage and promote public interest and awareness of the City's heritage resources and cultural opportunities.
8. Develops and coordinates cultural and heritage events, workshops and educational programs to create awareness and enhance learning of Vaughan's cultural heritage.
 10. Provides photographic documentation of Vaughan's architectural heritage for use in designation reports, displays, etc.
 11. Liaises with owners of heritage properties, responds to enquiries, resolves problems and responds to complaints from the general public, civic administration, community groups, local elected representatives, consultants and external agencies with respect to the conservation of heritage resources.
 13. Provides evidence before the Conservation Review Board and the Ontario Municipal Board, as required.
 14. Performs other related duties that may occur in an unplanned or emergency situation.

VIII. EDUCATION & EXPERIENCE REQUIREMENTS:

1. University Degree in Architectural History, Planning, Geography, Education or suitable equivalent.
 2. Minimum three (3) years' experience in primary source research and heritage conservation. Experience as a museum Curator providing public education programs considered an asset.
 3. Thorough working knowledge of the Ontario Heritage Act, Planning Act, Building Code and Canadian Architectural History.
 4. Excellent marketing, communication, interpersonal, research and report writing skills.
 5. Valid Ontario Class "G" driver's license, in good standing and a reliable vehicle to use on corporate business.
 6. Availability to work flexible hours; some evening and weekend work will be required.

Appendix VII - Schedule V

New Initiatives Business Case

1) The Initiative

This initiative involves developing and implementing field level computing which would facilitate the creation of on-site data input of data from forestry site inspections into a database which could be utilized to generate work orders

2) Link to the Vaughan Vision

- A-1 Pursue Excellence in the Delivery of Core Services
- D-1 Enhance Productivity & Cost Effectiveness
- D-3 Enhance Technology & Pursue Innovation

3) Stakeholder Impact

The public stakeholder impact is that the inspection work information is automatically inputted into a database system real time when it is recorded. Council, senior management and staff will all have real time access to work orders which have been generated. Further, from a budgeting perspective, a more accurate work order count can be obtained. Further, work can be better managed and organized when all work orders have been inputted into the system.

BUSINESS UNIT NUMBER:

BUSINESS UNIT NAME: *Parks Operations*

Appendix VII Schedule Y

**New Initiatives/Service Level Adjustments
Business Case**

4) Economic Impact, Cost/Benefit Analysis

Costs:	<u>(\$ dollars)</u>
2007 operating costs to implement:	
• Blackberry equipment – per unit	\$ 59
• x 2 units = \$118	
• Monthly air time cost – per unit (units) x 12 (months)	\$ 70.00 x 2
• Information technology set up cost and development	*\$30,000.00
TOTAL:	\$31,798.00

* (if done in conjunction with By-Law project with Frank Fazzari)

2008 Full year impact:	
• Monthly air time cost – per unit	\$ 70.00 x 2 x 12
TOTAL	\$1,680.00

Associated Capital costs:

N/A

Other:

N/A

Benefits:

Improved efficiency in inputting data from the field into a generated work order. It takes approximately 7 minutes to open and close a work order. Approximately 4,800 work orders were opened and closed in 2005. This equals a savings of 33,600 minutes or 560 hours or 80 days.

Also, It takes 10 minutes to find a non-inputted work order. With approximately 3200 non-inputted work orders, this equals 32390 minutes or 450 hours or 77 days.

Conclusion:

There are significant efficiency savings through the implementation of field based computing.

BUSINESS UNIT NUMBER: _____

BUSINESS UNIT NAME: _____

Appendix V / Schedule A

New Initiatives/Service Level Adjustments Business Case

5) Consequences for not Carrying Out the Initiative

If this initiative is not implemented, the status quo will be retained which will result in lost efficiency savings, and increased customer dissatisfaction through the inability to access real time information regarding work order status. Further, there is a risk of misplaced or lost work orders and an inability to provide a management tool to better manage the Forestry productivity through having access to information such as how many work orders were generated by each staff member.

6) Performance Success Measures

Potential performance measures which could be developed includes:

- Number of work orders developed by staff
- Throughput time on generating and closing a work order
- Number of calls from dissatisfied customers

7) Timelines (Implementation & Full Rollout)

The rollout of this initiative would be dependent upon Information Technology Management and whether a security link could be provided with field level data input and Corporate database retention. Further, this initiative is being explored with the Enforcement Services unit and thus would be timely to couple with this project to share development costs.
