

FIELDSTONE TRAFFIC CONTROL

Recommendation

Councillor DiVona recommends:

1. That the petition from the residents of Fieldstone Drive with respect to traffic calming measures on Fieldstone Drive, be received; and
2. That Vaughan Council direct Engineering staff to attend a public meeting.

Purpose

To address Fieldstone Drive traffic control.

Background - Analysis and Options

The residents are dealing with high speeding vehicles, traffic violations, air and noise pollution, traffic congestion, safety of our families, privacy due to Fieldstone can be accessed by not only Woodbridge residents but from other communities. The excessive speeding occurs at all hours of the day and night.

Conclusion

The residents of Fiori Drive and neighbouring street request changes to Fieldstone Drive in order to reduce the high speeds of vehicles. Residents are requesting the closure of Fieldstone and Weston Road. They would like to have a gate installed with an electronic remote for the fire hall so they can access the street off Weston Road. Also they are requesting the extension of the driveway off Weston Road for the fire trucks to exit. They suggested doing a left turn lane entering at the Best Buy entrance with coordinating left turn traffic lights.
