

**CANADA-ONTARIO MUNICIPAL RURAL INFRASTRUCTURE FUND (COMRIF)  
INTAKE ONE FUNDING ANNOUNCEMENT AND FUTURE INTAKE DATES**

**Recommendation**

The Commissioner of Finance & Corporate Services, the Commissioner of Engineering & Public Works and the Director of Reserves & Investments recommend:

THAT the information contained in this report with respect to the COMRIF program be received for information purposes.

**Economic Impact**

There is no economic impact as this is an information item.

**Purpose**

The purpose of this report is to provide Council with information pertaining to the Canada-Ontario Municipal Rural Infrastructure Fund (COMRIF) program Intake-One funding announcements and provide information on future intake dates.

**Background - Analysis and Options**

On November 15, 2004, the \$900 million COMRIF program was launched to improve and renew public infrastructure across the province. COMRIF targets the infrastructure needs of small urban and rural communities with a population of less than 250,000 people.

The City of Vaughan submitted an application entitled "Watermain Replacements – Various Locations" in the amount of \$9,516,000 for the first Intake deadline of January 10, 2005 of which \$6,344,000 was to be funded from the COMRIF program (if approved) and the balance of \$3,172,000 was approved in the City's 2005 capital budget.

Over 350 applications were received by COMRIF requesting Federal and Provincial assistance valued at over \$1.3 billion, for projects valued at over \$2 billion for Intake-One. On April 25, 2005 COMRIF announced funding for 120 of those applications which did not include the City of Vaughan application. COMRIF used a weighting of three criteria to determine which projects received funding:

1. Public Health & Safety – a score is given based on the risk to public health & safety. For water projects the associated risks would include the risk of microbiological contamination or real structural failure (as opposed to proactive replacement);
2. Value for Money – the cost effectiveness of the approach and the amount per benefitting household. This ratio is calculated by dividing the project value by the number of benefitting households (based on this calculation, smaller municipalities would derive a higher value per benefitting household for projects of similar amounts);
3. Public Policy Priority – alignment with current public policy priority of the Federal and Provincial governments – for Intake One these were cleaner water, better sewage systems, improved waste management and safer local roads and bridges.

Discussions with COMRIF staff indicated that their weighting of these three criteria for City of Vaughan projects was low compared to other municipal submitted projects and therefore did not make the funding cut-off. They would most likely rank low if re-submitted in the future. The low weighting is attributed to Criteria #2, Value for Money. This is due to Vaughan's large population.

The criteria for Intake Two is expected to be announced in June 2005 with a fall application deadline. After Intake Two is announced and the Public Policy Priorities have been established – staff will bring forward a plan for Council approval prior to the next submission deadline.

### **Relationship to Vaughan Vision 2007**

COMRIF and this report are consistent with the Vaughan Vision Statement “promotes a safe, livable and sustainable environment” and through the enhancement of non-tax revenues by evaluating and increasing grants and subsidies available from external agencies.

This report is consistent with the priorities previously set by Council and the necessary resources have been allocated and approved.

### **Conclusion**

The COMRIF funding announcement did not include approved funding for the City of Vaughan application entitled “Watermain Replacements – Various Locations”. When the Intake Two deadline is announced, Staff will bring forward additional projects for Council approval for submission. With the anticipation of an Intake Two announcement in June 2005 with a fall deadline and a Spring 2006 Intake, Staff are continuing the process of preparing for these deadlines.

## News Room

### CANADA AND ONTARIO INVEST OVER \$249 MILLION IN MUNICIPAL RURAL INFRASTRUCTURE

#### News Release - Communiqué

For immediate release - April 25, 2005

### CANADA AND ONTARIO INVEST OVER \$249 MILLION IN MUNICIPAL RURAL INFRASTRUCTURE

#### Ontario residents to benefit from improvements to local communities

**NORTH BAY** – Delivering on their commitment to build strong, sustainable communities, the governments of Canada and Ontario today announced investments of up to \$249,178,024 in 120 communities through Intake One of the Canada-Ontario Municipal Rural Infrastructure Fund (COMRIF).

Together with municipal contributions, the total investment in local infrastructure improvements will be over \$370 million. The investments announced today will provide municipalities with the support they need to renew essential infrastructure in their communities.

Local announcements with specific project details are being made across the province. A listing of funded projects is available in the attached [backgrounder](#).

These investments cover the full range of COMRIF Intake One priorities, including improvements to provide clean, safe drinking water, better sewage systems, improved waste management processes, and safer roads and bridges. There are two additional application intakes planned under COMRIF.

"Through these investments in sustainable public infrastructure, the Government of Canada is making real progress on the New Deal for Cities and Communities in Ontario," said Joe Comuzzi, Minister of State (Federal Economic Development Initiative for Northern Ontario) and federal Minister responsible for COMRIF. "By working collaboratively with our municipal and provincial partners to make these investments, we are improving the overall quality of life for Canadians across Ontario."

"This news will make a real difference to our small urban and rural communities," said John Gerretsen, Ontario Minister of Municipal Affairs and Housing. "Ontarians in 120 communities will directly benefit from these essential infrastructure upgrades - part of our government's plan to build healthy, strong communities."

"COMRIF is an important trilateral partnership for Canada, Ontario and municipalities in this province. It demonstrates that investment in municipal infrastructure is a shared responsibility that creates tangible economic and environmental benefits locally, provincially and nationally," said Roger Anderson, President of the Association of Municipalities of Ontario.

Under COMRIF, the governments of Canada and Ontario are working together with the Association of Municipalities of Ontario and local governments to enhance and renew Ontario's aging public infrastructure, improve the quality of the environment, protect the health and safety of citizens, support long-term economic growth and build strong, sustainable communities by giving municipalities the tools they need.

The Governments of Canada and Ontario are each contributing up to \$298 million to COMRIF. With municipal investments, this program is expected to stimulate up to \$900 million in capital investments over five years.

"The New Deal for Cities and Communities recognizes that municipalities require stable, long-term and predictable funding for infrastructure," said John Godfrey, Minister of State (Infrastructure and Communities). "Through initiatives such as COMRIF, the Government of Canada is working with our partners to support the growth of sustainable communities across the country - this is part of the New Deal for Cities and Communities." The Government of Canada's funding for this initiative was provided for in the February 2005 federal budget and complements other initiatives such as the five-year gas tax transfer of \$1.865 billion to Ontario municipalities, added Minister of State Godfrey.

"The announcement today is great news for communities across Ontario, and together we are making sure that the renewal of public infrastructure takes place," said David Caplan, Ontario Minister of Public Infrastructure Renewal. "There's a pressing need now and in future for the kind of collaborative funding solutions that programs such as COMRIF provide."

COMRIF Intake Two will be launched in the coming weeks through a public announcement and direct contact with eligible municipalities. All Ontario municipalities of less than 250,000 people are eligible to apply to COMRIF to improve their local infrastructure. Eligible municipalities can submit one application per intake, and may decide to re-submit a project that was not funded under Intake One.

For further information on the Canada-Ontario Municipal Rural Infrastructure Fund, please visit [www.comrif.ca](http://www.comrif.ca) or contact the COMRIF Joint Secretariat at 1-866-306-7827.
