

**2007 DRAFT CAPITAL BUDGET****Recommendation**

The City Manager, the Commissioner of Finance & Corporate Services, the Senior Management Team and the Director of Reserves & Investments recommends:

1. That the following report on the 2007 Draft Capital Budget be received for information and discussion purposes;
2. That Council amend the Development Charges policy guideline previously approved by Council to recognize that most growth related studies must proceed in advance of development and allow the management studies to be undertaken in advance of the DC funds being collected;
3. That recognizing that the Block 10 community centre is the next indoor recreation facility to be constructed based on the development charge (DC) capital plan that Council commit the DC funds currently collected for indoor recreation (\$15M) and sufficient future funds to be collected for the future construction of the North Thornhill Community Centre; and
4. That the funding for the green bin program approved in 2006 be amended to reflect the recent approval of a Green Funds grant thereby eliminating the requirement for taxation funding and reducing the use of "gas tax" funding.

**Economic Impact**

The 2007 Draft Capital budget is \$59,238,280 and funded from a variety of sources (Attachment 1). The Draft Capital budget is in keeping with Council approved policies and recognizes the limited amount of tax dollars available for capital work. The future operating budget impact of the draft capital budget is \$1,845,400 or a 1.82% tax increase.

**Purpose**

The purpose of this report is to provide the Members of the Budget Committee an opportunity to comment on the 2007 Draft Capital Budget.

**Background - Analysis and Options**

In the preparation of the Capital Budget a number of issues were taken into consideration. The continued pressures of pressure of growth, maintaining existing infrastructure and the provision of new services were balanced against available funding, the impact on the Operating budget and the available staff resources to undertake and properly manage the projects.

Total capital funds requested equals \$117,746,575. The Draft 2007 Capital Budget submission totals \$59,238,280. Capital projects are funded from four main sources: Development Charges, Reserves, Taxation and Long Term Debt. Departments have prioritized the projects within each funding source. Based on previously approved Council policies, Finance staff have assessed the availability of funding and established a funding line within each funding source. The following list summarizes the financial policy areas:

- 1) Level of Discretionary Reserves
- 2) Level of Working Capital
- 3) Level of Debt
- 4) The requirement of funds to be on hand prior to Project approval

These policies have had a positive impact on the financial stability of the municipality. The following summarizes the key financial information ratios compared to targets approved by Council.

	<u>Projected Dec. 31, 2006</u>	<u>Approved Target</u>
Net Development Charge Balance	\$63.4M	N/A
Discretionary Reserve Ratio	54.7%	50% of own source revenue
Working Capital	11.2%	10% of own source revenue
Debt Level *	5.21%	10% of own source revenue

\*Includes Commitments for OSA & Vaughan Sports Complex

### **Development Charges**

In reviewing the projects submitted to be funded from development charges, the following previously approved guidelines endorsed by Council were taken into consideration:

- 1) No service category with a positive balance should be placed into a pre-financing position (requirement of funds to be on hand)
- 2) Service category pre-financing should not be increased; and
- 3) Commit no more than 50% of anticipated revenues for any service category

Each department prioritized the projects within each development charge funding source. Finance staff assessed the funding availability and established a specific funding line for each service. With the exception of Management Studies the 2007 Draft Capital Budget is within these guidelines.

There is often a requirement to complete growth related studies in order to plan for and proceed with future development. Consequently it can be expected that the growth related Management Studies account will be in a deficit until development build out. Based on the above staff recommend Council amend its policy/guideline and exclude Management Studies account from the Development Charges policy/guidelines to permit the account to be in a deficit position, Overall DC accounts should have a positive balance notwithstanding the deficit in this one DC account.

A key financial policy approved by Council is the requirement of funds to be identified prior to the project being approved.

The construction of the North Thornhill Community Centre located in Block 10 (Project BF-8114-07) was scheduled initially for construction over 2004/05 based on the growth forecast in the Development Charge Background Study. It is the next indoor recreation facility to be constructed based on the capital plan in the DC Background Study. Total cost of the project is \$25,974,500 (City Wide Development Charges – Recreation \$23,377,050 and Taxation \$2,597,450). The community center design funds were approved in 2003. As of December 31, 2006 the uncommitted net balance in the City Wide Development Charges – Recreation account is \$15,544,862. Based on the financial policy on the requirement of funds be on hand prior to project approval, this project is not recommended to proceed at this time. Since, based on the capital plan in the Development Charge Study the Block 10 Community Centre is the next facility to be constructed, staff recommend committing \$15M of the City Wide Development Charges – Indoor Recreation funds for the future construction of the North Thornhill Community Centre located in Block 10 and future funds sufficient to construct the facility. If the level of development activity continues throughout 2007 it is anticipated that the additional \$8,377,050 City Wide Development Charges – Recreation funds for the balance of this project will be received during 2007, thus allowing the project to be tendered early 2008 once the project receives final approval during the 2008 Capital Budget deliberations.

On projects such as this there is a requirement to fund 10% from a source other than development charges. The source most often is taxation. An advantage of funding this large project over two (2) years is that the 10% or \$2.5M from taxation is also split over two (2) years.

### **Long Term Debt**

The capital projects identified for long term debt financing are typically large projects (road resurfacing, road reconstruction, road upgrading) that have no other source of funding other than taxation.

Under Ontario Regulation 403/02, a municipality may borrow or undertake financial obligations provided that the annual repayment limit related to the debt and financial obligations do not exceed 25% of net revenue fund revenue. It is recommended that the capital projects identified above the funding line from long term debt totaling \$10,969,000 be approved (Attachment 3).

Once Council approves the long term debt funded capital projects, staff will prepare the tender and request for the approval of the award of tender. When these projects are complete and costs finalized the City requests and authorizes the Region of York to issue the debenture on the City's behalf.

Taking into account the additional debt contemplated by the draft capital budget, the City of Vaughan debt charges are still within the 10% debt ratio policy approved by Council. The annual debt repayment limit calculated pursuant to Ontario Regulation 403/02 for the proposed debt charges and financial obligations is 5.21% of net revenue fund revenue, well within the 25% maximum allowed under the regulation. The issuance of the long term debt will have an estimated future annual operating budget impact of \$1,420,500.

### **Taxation**

Projects identified from taxation funding are smaller non-growth related projects that have no other source of funding such as technology, infrastructure repair, studies, etc.. Also included in the taxation funding request is the 10% co-funding requirement of the Development Charges Act for certain growth related services (Libraries, Recreational Complexes, Parks and Vehicles).

The 2007 Capital requests from Taxation is \$35,146,045. The amount of funding available for taxation funded projects from the 2007 Draft Operating Budget is \$6,537,000. Staff have also reviewed the list of previously approved taxation funded projects and have identified an additional \$866,000 in available funds. The additional funding has become available as a result of the recent approval of a Green Funds grant and gas tax funding. As a result, the revised total taxation funding available for the 2007 taxation funded capital projects is \$7,403,000. Senior Management Staff reviewed the \$35.1M request and prioritized the projects totaling \$7,403,000 (Attachment 4). Of this amount \$2,375,440 relates to development charge co-funding required under the Development Charges Act. Any further approval of the taxation funded capital request in excess of \$7,403,000 would have an additional impact on the 2007 Operating budget and the property tax rate.

### **Infrastructure Repair & Replacement**

The Long Range Financial Planning Study (LRFP) presented to the February 28, 2006 Committee of the Whole (Working Session) assessed the need for and began to quantify the financial impact of the repair and replacement of the City's major capital assets. The LRFP provides an infrastructure repair and replacement forecast based on the various departments lifecycle forecasting. Assets were scheduled for replacement based on the assets estimated useful life. The results of the LRFP identified that the City infrastructure repair and replacement is significantly under funded. A comprehensive infrastructure funding strategy is required. Several years ago staff recognized the need to direct more funding for infrastructure repair and replacement. In approximately 1998 the City began to provide limited funding to reserves created for the major repair or replacement of building and facilities, parks and roads. Based on Council policy the combined balance in these and other reserves is such that there is an opportunity to

now utilize some of these reserve funds. The funds available in each of the Reserves mentioned above is as follows.

	<b>Est. Available Funding</b>
Bldg Infrastructure Pre 99	\$1,047,540
Bldg Infrastructure Post 98	\$838,420
Roads Infrastructure	\$694,150
Parks Infrastructure	\$319,714

With the proposed identified funding available from these reserves for assets beyond their life cycle, the estimated discretionary reserve ratio for 2007 remains above the 50% Council policy. Future expenditure from these and other reserves will depend on the annual reserve contributions, interest earned and whether or not the 50% discretionary reserve ratio can be maintained.

### **Municipal Gas Tax Funds**

Eligible infrastructure under the Municipal Gas Tax Funding agreement are projects that are environmentally sustainable municipal infrastructure projects with the following categories:

- Public Transit
- Water
- Wastewater
- Solid waste
- Local roads, bridges & tunnels
- Active transportation infrastructure (e.g. bike lane)
- Capacity building and community energy systems (e.g. retrofit municipal buildings and infrastructure)

The municipality must also clearly demonstrate that the funding used for a project is incremental and the funding either enabled a project's implementation, enhanced its scope or accelerated its timing. The objective of the Gas Tax Program is to increase the amount of infrastructure repair and replacement and not to simply replace other sources of funding. Therefore the use of the gas tax funds must be incremental.

Under the agreement the calculation for the incremental amount for the City of Vaughan is calculated as follows:

Average municipal spending on eligible project categories for the period Jan 1, 2000 to Dec 31, 2004	\$56,254,885.00
Plus:	
Municipal Gas Tax Funding Nov. 15, 2005 to Nov. 15, 2009	<u>\$14,786,956.41</u>
Total municipal spending on eligible project categories for The period April 1, 2005 to March 31, 2010	<u>\$71,041,841.41</u>

Reconciliation of funds received and committed is as follows:

Gas Tax Funds received to date – Dec. 31/06	\$3,549,313
Less Commitment Green Bin	<u>\$1,356,000</u>
<b>Balance available for Eligible Projects</b>	<b><u>\$2,193,313</u></b>

Staff have reviewed the list of capital projects submitted and with concurrence of AMO staff have identified a number of capital projects eligible under the Municipal Gas Tax Funding Agreement.

The list of projects totaling \$1,544,000 is identified above the Gas Tax Reserve funding line. Further expenditure plans will be provided for the balance and future gas tax revenues.

### **Reserve Continuity Schedule**

The Reserve Continuity Schedule (Attachment 5) identifies all the City's reserves and deferred revenue account (DC's) and illustrates the estimated balance at the end of 2006 and the balances after funding the proposed 2007 Capital budget. The continuity schedule is useful for tracking reserve balances and ensuring funds are on hand prior to project approval.

### **Operating Budget Implication**

The proposed 2007 Draft Capital Budget funding lines have been recommended to Council. Should Council approve the capital projects above the proposed funding line, the estimated future operating cost implication is estimated at \$1,845,400 or approximately 1.82% increase in the property tax when the projects are complete.

### **Relationship to Vaughan Vision 2007**

The budget process links the Vaughan Vision 2007 through the setting of priorities and allocation of resources.

### **Conclusion**

The City Manager with the Senior Management Team and Finance staff have reviewed the Capital budget submission and have established priorities and appropriate funding lines. The 2007 Draft Capital Budget is \$59,238,280. The Operating budget implication for the 2007 Draft Capital Budget included in this report is \$1,845,400 or approximately 1.82% property tax increase when the projects are complete.
