

COMMITTEE OF THE WHOLE – JUNE 19, 2012

PROPOSED STORM WATER MANAGEMENT POND NAMES

Recommendation

The Commissioner of Engineering and Public Works recommends:

That subject to any amendments or changes that Council may wish to make, the attached list of storm water management pond names be approved.

Contribution to Sustainability

Storm water management ponds are vital in mitigating the threat of flooding by slowing the flow of water into local creeks and rivers. They also serve to improve downstream water quality by allowing suspended materials to settle out of the water over time.

In many locations, these ponds are a dominant feature in the area that attracts the attention of the public. By naming and signing these ponds, a sense of place will be created.

Economic Impact

The necessary funds to place the appropriate pond name signage have been approved as part of the 2012 Water / Wastewater Budget.

Communications Plan

Public Works will work with Corporate Communications to develop a communications strategy to advise the public, and map producers and providers, of this initiative, once the pond names have been approved.

Purpose

To present Council with the list of proposed pond names for approval.

Background - Analysis and Options

At its meeting of May 15, 2012, Committee of the Whole recommended:

- 1) *That the recommendations contained in the following report of the Commissioner of Engineering and Public Works, dated May 15, 2012, be approved;*
- 2) *That the following recommendations, in accordance with Communication C9, memorandum from the Commissioner of Engineering and Public Works, dated May 8, 2012, be approved; and*
- 3) *That, where staff deem appropriate, additional pond name signage be placed close to the life saving stations; and*
- 4) *That the revised Additional Resource Request concerning the installation of signage at the City's storm water management ponds be approved; and*
- 5) *That no naming occur until staff report back to the June 5, 2012 Committee of the Whole meeting with a list of proposed names.*

In response to recommendation No. 5, staff have reviewed documentation to find any existing names that may exist for storm water management ponds, and compiled a list of proposed names, based on the draft naming policy put forward at the May 15, Committee of the Whole meeting.

In compiling the list of pond names, dry ponds, were not included. As their name implies, most of the time, these ponds contain no water. As such, placing signage indicating them to be a "pond" may be inappropriate.

The proposed names are attached to this report for Council consideration and approval. Should Council wish to amend the list of proposed names, staff will incorporate the changes prior to placing the order for the signs and finalizing the communications plan.

Relationship to Vaughan Vision 2020/Strategic Plan

This report is consistent with the priorities previously set by Council and ties into the following Vaughan Vision 20/20 Goals and Objectives:

Goal: Organizational Excellence
Objective: Manage Corporate Assets

Regional Implications

There are no Regional implications as a result of the recommendations contained in this report.

Conclusion

In accordance with the direction given at the May 15, 2012 Committee of the Whole meeting, staff has prepared the list of proposed pond names for approval. Should Council wish to amend the list of proposed names, staff will incorporate the changes prior to placing the order for the signs and finalizing the communications plan.
